Amend the title of the Regulation (title page and pages iii and i), to read:

"UNIFORM PROVISIONS CONCERNING THE APPROVAL OF PNEUMATIC TYRES FOR MOTOR CYCLES AND MOPEDS"

Paragraph 1., amend to read (including the footnote):

"1. SCOPE

This Regulation covers new pneumatic tyres designed for road use of mopeds and motor cycles (categories LI, L2 and L3 and L4)*/ and motor cycle derivatives (category L5)/*. It does not cover:

(a) New tyres for motor cycles designed for speeds exceeding 210 km/h;

(b) New tyres designed only for "off-road" use and marked NHS (not for highway service) or for competitions.

Because of the design characteristics of moped and motor cycle tyres, and particularly those of the tread, a substantial number of different types of tyres of the same nominal dimensions are available on the market. It appears desirable, for reasons of safety, that vehicles should be designed in such a manner as to accept all the different types of tyres which are available to the customer.

*/ As defined in the Consolidated Resolution on the Construction of Vehicles (R.E.3) – document TRANS/SC1/WP29/78/Amend.3"

Paragraph 2.1.3., add at the end:

3.9. Position the contour outline device and ascertain that it is perpendicular to the rotation of the test tyre tread.

3.10. Check that the peripheral speed of the tread surface is within ± 2% of the maximum speed capability for the tyre. Maintain the equipment at constant speed for at least five minutes and then portray the tyre cross-section in the area of maximum deformation, or check that the tyre does not exceed the enveloping curve."

Paragraph 4.2., amend to read:

"4.2. The contour of the tyre portrayed at the maximum speed shall not exceed the enveloping curve, with reference to the tyre axes."
