

ALPHABETICAL INDEX

EXPLANATORY NOTE

(See also the GENERAL INTRODUCTION)

The Alphabetical Index appears in the same form as and is based on the same principles as those applied in *Cumulative Indexes* Nos. 1-19.

The Index consists of two types of main headings arranged in one alphabetical listing: 1) names of countries, intergovernmental organizations, specialized agencies, national institutions or other parties to instruments and (2) subject-headings of the instruments.

Under the main country heading (or organization) the instruments are listed alphabetically by country or organization and then by short-title. A country or organization is usually listed only once, either as the first or as the second signatory party, in alphabetical order. The *multilateral* instruments are listed alphabetically by short title under the heading *multil.*

If any objections are made to declarations or reservations of other states, the reference to them will be found in the alphabetical index under the subject-headings and under the state that made the objections. These objections will not be found under the state that made the original declaration or reservation in respect of which the objection was made.

In using the alphabetical part of the Index it should also be noted that related subject-headings are linked together either by *See* cross-references, derived from the title of an agreement and used to direct the reader to the particular subject-heading containing that agreement, or by *See also* cross-references, which are intended to link similar subject-headings available in the present Index.

In addition, it should also be kept in mind that certain multilateral agreements of universal character, such as international conventions signed and registered under the auspices of the United Nations specialised agencies and large regional organizations, appear under the subject-headings for those agencies and organizations.
