

## EXPLANATORY NOTE

(See also the GENERAL INTRODUCTION)

The Alphabetical Index appears in the same form and is based on the same principles as those applied in *Cumulative Indexes* Nos. 1-11.

The Index consists of two types of main headings arranged in one alphabet: (1) names of countries and organizations parties to instruments, and (2) subjects of the instruments.

Under the main country heading (or organization) the instruments are listed in alphabetical order by the second signatory party followed by the short title. The General International Agreements and the multilateral instruments in which a particular country participated are listed under these headings arranged alphabetically by short title.

Under each subject heading the instruments are listed alphabetically by country or organization and then by short title. A country or organization is usually listed only once, either as the first or as the second signatory party, in alphabetical order. The General International Agreements and the multilateral instruments are listed alphabetically by short title under these headings.
