#### NOTE BY THE SECRETARIAT

Under Article 102 of the Charter of the United Nations every treaty and every international agreement entered into by any Member of the United Nations after the coming into force of the Charter shall, as soon as possible, be registered with the Secretariat and published by it. Furthermore, no party to a treaty or international agreement subject to registration which has not been registered may invoke that treaty or agreement before any organ of the United Nations. The General Assembly, by resolution 97 (1), established regulations to give effect to Article 102 of the Charter (see text of the regulations, vol. 859, p. VIII).

The terms "treaty" and "international agreement" have not been defined either in the Charter or in the regulations, and the Secretariat follows the principle that it acts in accordance with the position of the Member State submitting an instrument for registration that so far as that party is concerned the instrument is a treaty or an international agreement within the meaning of Article 102. Registration of an instrument submitted by a Member State, therefore, does not imply a judgement by the Secretariat on the nature of the instrument, the status of a party or any similar question. It is the understanding of the Secretariat that its action does not confer on the instrument the status of a treaty or an international agreement if it does not already have that status and does not confer on a party a status which it would not otherwise have.

. .

Unless otherwise indicated, the translations of the original texts of treaties, etc., published in this Series have been made by the Secretariat of the United Nations.

### NOTE DU SECRÉTARIAT

Aux termes de l'Article 102 de la Charte des Nations Unies, tout traité ou accord international conclu par un Membre des Nations Unies après l'entrée en vigueur de la Charte sera, le plus tôt possible, enregistré au Secrétariat et publié par lui. De plus, aucune partie à un traité ou accord international qui aurait dû être enregistré mais ne l'a pas été ne pourra invoquer ledit traité ou accord devant un organe des Nations Unies. Par sa résolution 97 (1), l'Assemblée générale a adopté un règlement destiné à mettre en application l'Article 102 de la Charte (voir texte du règlement, vol. 859, p. 1X).

Le terme «traité» et l'expression «accord international» n'ont été définis ni dans la Charte ni dans le règlement, et le Secrétariat a pris comme principe de s'en tenir à la position adoptée à cet égard par l'Etat Membre qui a présenté l'instrument à l'enregistrement, à savoir que pour autant qu'il s'agit de cet Etat comme partie contractante l'instrument constitue un traité ou un accord international au sens de l'Article 102. Il s'ensuit que l'enregistrement d'un instrument présenté par un Etat Membre n'implique, de la part du Secrétariat, aucun jugement sur la nature de l'instrument, le statut d'une partie ou toute autre question similaire. Le Secrétariat considère donc que les actes qu'il pourrait être amené à accomplir ne confèrent pas à un instrument la qualité de «traité» ou d'«accord international» si cet instrument n'a pas déjà cette qualité, et qu'ils ne confèrent pas à une partie un statut que, par ailleurs, elle ne posséderait pas.

Sauf indication contraire, les traductions des textes originaux des traités, etc., publiés dans ce Recueil ont été établies par le Secrétariat de l'Organisation des Nations Unies.

#### GENERAL NOTES

- 1. Relation to Tariff Schedules of the United States. (a) The provisions of this schedule are generally expressed in terms of the Tariff Schedules of the United States. To the extent that all relevant provisions of this schedule relating to a concession are identical to the corresponding provisions of the Tariff Schedules of the United States, the provisions of this schedule shall have the same meaning as the corresponding provisions of such Tariff Schedules. The application to a particular provision of this schedule of portions of the Tariff Schedules of the United States not included herein, and of other laws of the United States, shall be the same as the application of such portions of the Tariff Schedules, and other laws, to the provisions of the Tariff Schedules of the United States corresponding to such particular provision.
- (b) To facilitate an understanding of the scope of the tariff rate concessions herein, this schedule includes titles, headnotes, item numbers, and article descriptions in the Tariff Schedules of the United States which do not themselves describe such concessions. Such article descriptions (together with identifying item numbers) are bracketed and shaded. If such articles are contained in a prior Schedule XX, the most recent concession rate of duty is also shown in brackets. Articles described in the bracketed portions are not the subject of concession in this Schedule XX and are not subject to the provisions of the Protocol to which this Schedule XX is annexed.
- (c) To avoid confusion in terminology within this schedule, the major divisions thereof have been designated as sections (rather than as schedules as in the Tariff Schedules of the United States) and the subsidiary divisions have been designated as chapters and units (rather than as parts and subparts, respectively, as in the Tariff Schedules of the United States). Headnotes of the Tariff Schedules of the United States have been designated as notes. Some notes in this schedule do not appear in the Tariff Schedules of the United States, and some notes in the Tariff Schedules of the United States have been omitted from this schedule. Such differences have been indicated by appropriate footnotes. 1/

<sup>1/</sup> This note 1 is not in the Tariff Schedules of the United States; TSUS general headnote 1 is omitted.

- 2. <u>Customs Territory of the United States</u>. The term "<u>customs territory of the United States</u>", as used in this schedule, includes only the States, the District of Columbia, and Puerto Rico.
- 3. Dates for Purposes of Article II of the General Agreement. The date applicable to each product that is the subject of a concession provided for in a part of this schedule, for the purposes of a reference in article II of the General Agreement to the date of that Agreement be --
- (a) if such reference is in paragraph 1(b) or (c) of that Article: The date of the Protocol to which this schedule is annexed, but without prejudice to any obligations in effect on that date, or
- (b) if such reference is in paragraph 6(a) of such Article: the date of the Protocol to which this schedule is annexed.  $\underline{1}/$ 
  - Intangibles. For the purposes of this schedule (a) corpses, together with their coffins and accompanying
     flowers.
    - (b) currency (metal or paper) in current circulation in any country and imported for monetary purposes,
    - (c) electricity,
    - (d) securities and similar evidences of value, and
- (e) vessels which are not "yachts or pleasure boats" within the purview of chapter 6D of section 6, are not articles subject to the provisions of the schedule. 2/
- 5. Containers or Holders for Imported Merchandise. For the purposes of this schedule, containers or holders are subject to tariff treatment as follows:
- (a) <u>Imported Empty</u>: Containers or holders if imported empty are subject to tariff treatment as imported articles and as such are subject to duty unless they are within the purview of a provision which specifically exempts them from duty.
- (b) Not Imported Empty: Containers or holders if imported containing or holding articles are subject to tariff treatment as follows:
  - (i) The usual or ordinary types of shipping or transportation containers or holders, if not designed for, or capable of, reuse, and containers of usual types

<sup>1/</sup> This note 3 is not in the Tariff Schedules of the United States; TSUS general headnote 3 is omitted.

<sup>2/</sup> TSUS general headnote 4 is omitted. TSUS general headnote 5 is renumbered as note 4 to this schedule.

ordinarily sold at retail with their contents, are not subject to treatment as imported articles. Their cost, however, is, under section 402 or 402a of the Tariff Act of 1930 (19 U.S.C. (1964) 1401a, 1402), a part of the value of their contents and if their contents are subject to an ad valorem rate of duty such containers or holders are, in effect, dutiable at the same rate as their contents, except that their cost is deductible from dutiable value upon submission of satisfactory proof that they are products of the United States which are being returned without having been advanced in value or improved in condition by any means while abroad.

- (ii) The usual or ordinary types of shipping or transportation containers or holders, if designed for, or capable of, reuse, are subject to treatment as imported articles separate and distinct from their contents. Such holders or containers are not part of the dutiable value of their contents and are separately subject to duty upon each and every importation into the customs territory of the United States unless within the scope of a provision specifically exempting them from duty.
- (iii) In the absence of context which requires otherwise, all other containers or holders are subject to the same treatment as specified in subparagraph (ii) above for usual or ordinary types of shipping or transportation containers or holders designed for, or capable of, reuse. 1/
- 6. Commingling of Articles. (a) Whenever articles subject to different rates of duty are so packed together or mingled that the quantity or value of each class of articles cannot be readily ascertained by customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:
  - (i) sampling,
  - (ii) verification of packing lists or other documents filed at the time of entry, or
  - (iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury,

<sup>1/</sup> TSUS general headnote 6 is renumbered as note 5 to this schedule.

the commingled articles shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the articles pursuant to paragraph (b).

- (b) Every segregation of articles made pursuant to this note shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary of the Treasury authorizes in writing a longer time) after the date of personal delivery or mailing, hy such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the articles are commingled and that the quantity or value of each class of articles cannot be readily ascertained by customs officers. Every such segregation shall be accomplished under customs supervision, and the compensation and expenses of the supervising customs officers shall be reimbursed to the Government by the consignee under such regulations as the Secretary of the Treasury may prescribe.
- (c) The foregoing provisions of this note do not apply with respect to any part of a shipment if the consigneee or his agent furnishes, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof --
  - (i) that such part (a) is commercially negligible, (b) is not capable of segregation without excessive cost, and (c) will not be segregated prior to its use in a manufacturing process or otherwise, and
  - (ii) that the commingling was not intended to avoid the payment of lawful duties.

Any article with respect to which such proof is furnished shall be considered for all customs purposes as a part of the article, subject to the next lower rate of duty, with which it is commingled.

- (d) The foregoing provisions of this note do not apply with respect to any shipment if the consignee or his agent shall furnish, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof —
  - (i) that the value of the commingled articles is less than the aggregate value would be if the shipment were segregated;
  - (ii) that the shipment is not capable of segregation without excessive cost and will not be segregated prior to its use in a manufacturing process or otherwise; and
  - (iii) that the commingling was not intended to avoid the payment of lawful duties.

Any merchandise with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.

(e) The provisions of this note shall apply only in cases where this schedule does not expressly provide a particular tariff treatment for commingled articles.  $\underline{1}/$

- 8. Definitions. For the purposes of this schedule, unless the context otherwise requires -
- (a) the term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;
- (b) the term "entered for consumption" does not include withdrawals from warehouse for consumption;
- (c) the term "withdrawn for consumption" means withdrawn from warehouse for consumption and does not include articles entered for consumption:
- (d) the term "rate of duty" includes a free rate of duty; and the rates of duty in column numbered 2 of the Tariff Schedules of the United States at the time such schedules became effective are referred
- to as "original statutory" rates of duty (see note 9(d));

  (e) the term "ton" means 2,240 pounds, and the term "short ton" means 2,000 pounds;
- of", and "containing", when used between the description of an article and a material (e.g., "furniture of wood", "woven fabrics, wholly of cotton", etc.), have the following meanings:

  (i) "of" means that the article is wholly or in chief value
  - of the named material;
  - (ii) "wholly of" means that the article is, except for negligible or insignificant quantities of some other material or materials, composed completely of the named material;
  - (iii) "almost wholly of" means that the essential character of the article is imparted by the named material, notwithstanding the fact that significant quantities of some other material or materials may be present; and
- (iv) "in part of" or "containing" mean that the article contains a significant quantity of the named material. With regard to the application of the quantitative concepts specified in subparagraphs (ii) and (iv) above, it is intended that the de minimis rule apply; and 1/
- (g) references to the "President", "Government", "Secretary of the Treasury", or other governmental body, or to a law, except where the context indicates otherwise, mean the President, Government, Secretary of the Treasury, or other governmental body, or law, of the United States. 2/

<sup>1/</sup> TSUS general headnote 9 is renumbered as note 8 to this schedule.  $\overline{2}/$  This note 8(g) is not in the Tariff Schedules of the United States.

- 9. General Interpretative Rules. For the purposes of this schedule --
- (a) the general, section, chapter, and unit notes, and the provisions describing the classes of imported articles and specifying the rates of duty or other import restrictions to be imposed thereon are subject to the rules of interpretation set forth herein and to such other rules of statutory interpretation, not inconsistent therewith, as have been or may be developed under administrative or judicial rulings;
- (b) the titles of the various sections, chapters, and units are intended for convenience in reference only and have no legal or interpretative significance;
- (c) an imported article which is described in two or more provisions of this schedule is classifiable in the provision which most specifically describes it; but, in applying this rule of interpretation, the following considerations shall govern:
  - (1) a superior heading cannot be enlarged by inferior headings indented under it but can be limited thereby;
  - (ii) comparisons are to be made only between provisions of coordinate or equal status, i.e., between the primary or main superior headings of the schedule or between coordinate inferior headings which are subordinate to the same superior heading;
- (d) if two or more tariff descriptions are equally applicable to an article, such article shall be subject to duty under the description for which the original statutory rate was highest, and, should the highest original statutory rate be applicable to two or more of such descriptions, the article shall be subject to duty under that one of such descriptions which first appears in the Tariff Schedules of the United States;
- (e) in the absence of special language or context which otherwise requires --
  - (i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined;

- (ii) a tariff classification controlled by the actual use to which an imported article is put in the United States is satisfied only if such use is intended at the time of importation, the article is so used, and proof thereof is furnished within 3 years after the date the article is entered;
- (f) an article is in chief value of a material if such material exceeds in value each other single component material of the article;
- (g) a note provision which enumerates articles not included in a section, chapter, or unit is not necessarily exhaustive, and the absence of a particular article from such note provision shall not be given weight in determining the relative specificity of competing provisions which describe such article;
- (h) unless the context requires otherwise, a tariff description for an article covers such article, whether assembled or not assembled, and whether finished or not finished; and
- (ij) a provision for "parts" of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part. 1/
- 10. <u>Issuance of Rules and Regulations</u>. The Secretary of the Treasury may issue rules and regulations governing the admission of articles under the provisions of the Tariff Schedules of the United States. The allowance of an importer's claim for classification, under any of the provisions of the said schedules which provide for total or partial relief from duty or other import restrictions on the basis of facts which are not determinable from an examination of the article itself in its condition as imported, is dependent upon his complying with any rules or regulations which may be issued pursuant to this note. <u>2</u>/
- 11. Methods of Analyzing and Testing Imports. The Secretary of the Treasury may prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring, or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical, or other properties or characteristics of articles for purposes of any law administered by the Customs Service. 3/

<sup>1/</sup> TSUS general headnote 10 is renumbered as note 9 to this schedule.

 $<sup>\</sup>overline{2}$ / TSUS general headnote 11 is renumbered as note 10 to this schedule.  $\overline{3}$ / TSUS general headnote 12 is renumbered as note 11 to this schedule.

- 12. Adjustment of Escape-Clause Compensation. In the event that action taken by the United States pursuant to article XIX of the General Agreement, for which compensatory concessions have been accorded by the United States, is terminated or liberalized, unless other provision has been made for adjustment of the balance of concessions, the United States and the contracting party or contracting parties with which the compensatory concessions were negotiated, and if appropriate, other contracting parties, will enter into negotiations and consultations with a view to reaching a mutually satisfactory adjustment of the balance of concessions under the General Agreement. 1/
- 13. The concessions provided for in the items in this schedule shall become initially effective, in most instances, subject to staging pursuant to general note 14, when the protocol to which this schedule is annexed enters into force for the United States and thereby this schedule becomes a schedule to the General Agreement; except that the initial effectiveness of the concessions provided for in the items listed in certain parts of Annex I to this schedule may be delayed until the conditions set forth in such parts have been met. 2/
- 14. Staging of Concessions. (a) The rate of duty set forth in the rate of duty column for each tariff item in this schedule on which a concession is granted is the full concession rate for the products included in the item. Each such concession item is subject to staging rules, as follows, unless otherwise provided in Annex I to this schedule. 3/
- (b) General staging rule. Each full concession rate shall become effective upon the expiration of a period of 7 years commencing with the effective date of this schedule, and during this period the amount of the duty reduction shall become effective in 8 equal annual stages. 3/
- (c) <u>Effective date of this schedule</u>. The effective date of this schedule is the date on which this schedule becomes a schedule to the General Agreement on Tariffs and Trade.
- (d) Application of specified number of stages. The concept that the total amount of duty reduction for a concession item shall become effective in a specified number of equal annual stages means that, for the year commencing on the effective date of this schedule (or other date specified) and for each year thereafter commencing on the same day of the year until the full concession rate is reached, the duty applicable under such concession shall be the base rate of duty under paragraph (e) of this note, or the concession rate during the immediately

<sup>1/</sup> This note 12 is not in the Tariff Schedules of the United States.
This note 13 is not in the Tariff Schedules of the United States.

preceding year, minus an amount equal to the difference between the base rate and the full concession rate divided by the number of equal annual stages.

- (e) Base rate of duty from which stages are calculated. For purposes of calculating successive stages of reduction, the amount of total reduction is determined by subtracting the full concession rate for the item in this schedule from the rate listed for the corresponding item in Annex II, or, if the item is not so listed, from the rate listed in rate column numbered 1 for the corresponding item in the Tariff Schedules of the United States Annotated (1978), as modified by Supplements 1 to 5 thereto.
- (f) Rounding. Notwithstanding the rate limitations set forth in paragraphs (b) and (d) of this note, and in Annex I, the rate in any year prior to the effectiveness of the full concession rate may exceed the rate provided for in such paragraphs or annex by not more than 0.05 percent ad valorem or, in the case of a specific or compound rate, by an amount the ad valorem equivalent of which does not exceed 0.05 percent.
- (g) Effect of other rates on staging. After the effective date of the first stage of reduction under paragraph (b) of this note or Annex I and before the full concession rate therefor has become effective, in determining the effective date of the full concession rate and the intervals between the effective date of successive stages:
- (i) the rate of duty provided for in paragraphs (b) or (d) of this note or Annex I shall be considered as being in effect even though a lower rate (including a free rate of duty) is being applied to an article to which such rate relates; and
- (ii) there shall be excluded any time during which a rate of duty higher than that provided for in paragraphs (b) or (d) or Annex I is being applied.
- (h) Consultations. In the event that the staging is delayed or interrupted as described in paragraph (g)(ii) of this note, the United States, in accordance with procedures under the General Agreement on Tariffs and Trade, shall afford any contracting party which has substantial interest as an exporter of a product involved an opportunity for consultations or negotiations with a view to reaching agreement on a mutually satisfactory adjustment of the balance of concessions under the General Agreement. 1/

<sup>1/</sup> This note 14 is not in the Tariff Schedules of the United States.

- 15. Since the concessions in this schedule have been included herein as part of a balance in return for the concessions included in their schedules by other participants in the 1973-1979 negotiations, the continuation of the concessions herein is dependent upon the implementation by such other participants of the uninterrupted staging of their concessions to the full concession rate. Should there be any significant interruption or delay by any other participant of the staging of its concessions of interest to the United States, or any other significant departure from the general implementation of its concessions, and a satisfactory adjustment to maintain the balance of reciprocal concessions is not reached with such other participant, the United States reserves the right to take such action regarding the staging or other general implementation of its concessions of interest to such other participant as is considered to be justified to restore the reciprocal balance of concessions. 1/
- 16. In the event that any other participant does not stage its tariff reductions on concession items of significant trade interest to the United States from the rate of duty applied as of the date on which the schedule of that participant becomes a schedule to the General Agreement on Tariffs and Trade, the United States reserves the right to take such action regarding the staging or other general implementation of its concessions of interest to such other participant as is considered to be justified to restore the reciprocal balance of concessions. 2/
- 17. The concessions provided for in the items in this schedule are granted with the understanding that the provisions of paragraph 3 of the Geneva (1979) Protocol to the to the General Agreement on Tariffs and Trade will apply to all concessions the United States negotiated in the Multilateral Trade Negotiations 1973-1979. 3/
- 18. The United States reserves the right to modify concessions on the items listed below to the extent necessary to bring them into conformance with the United States list of products for duty-free treatment which is annexed to the Agreement on Trade in Civil Aircraft, entered into on April 12, 1979, on the date on which that agreement is accepted.

	SECTION 1 ANIMAL AND VEGETABLE PRODUCTS	
	CHAPTER 1 LIVE ANIMALS	
	Notes:	
	1. This chapter covers all live animals, verte- brate and invertebrate, except fish and shellfish (see chapters 3 and 15 of this section) and microbial cultures (see chapter 3 of section 4), but including whales and other sea mammals.	
	2. Unless the context requires otherwise, each provision for named or described animals applies to such animals regardless of their size or age, e.g., "sheep" includes lambs.	
	3. Certain special provisions applying to live animals are in section 8.	,

The meats of all animals, including whales and other sea mammals but not fish and shellfish (see chapters 3 and 15 of this section), are covered, and unless the context requires otherwise, reference to an animal includes such animal regardless of size or age.  2. In assessing the duty on meats, no allowance shall be made for normal components thereof such as bones, fat, and hide or skin. The dutiable weight of meats in airtight containers subject to specific rates includes the entire contents of the containers.  Unit A Bird Meat  Birds (dead), fresh, chilled, or frozen, if whole, or if plucked, beheaded, eviscerated, or cut into pieces (including edible offal), but not otherwise prepared or preserved:  Birds, whole, or which have been plucked only:  [Chickens, ducks, geese, and guineas]. 	Unit B Meats Other Than Bird Meat	
	Note:	
	1. For the purposes of this unit  (a) The term "fresh, chilled, or frozen" covers meats even though completely detendonized and deboned, but does not cover meats which have been prepared or preserved; and  (b) the term "prepared or preserved" covers meats even if in a fresh, chilled, or frozen state if such meats have been ground or comminuted, diced or cut into sizes for stew meat or similar uses, rolled and skewered, or specially processed into fancy cuts, special shapes, or otherwise made ready for particular uses by the retail consumer; and also covers meats which have been subjected to processes such as drying, curing, smoking, cooking, seasoning, flavoring, or to any combination of such processes.	
	2. In any period during which there is a limitation on the quantity of imports into the customs territory of the United States of meats provided for in items 106.10, 106.22, 106.25, or 107.61  (a) there shall be permitted entry during any calendar year a total quantity of not less than 1,200,000,000 pounds.  (b) If any quota on the meat described in paragraph (a) becomes effective after the beginning of a calendar year, the quantity of the quota product entitled to enter under the quota during the unexpired portion of the calendar year shall be not less than the respective annual quantity specified in paragraph (a) less 1/12 thereof for each full calendar month that has expired in such year.

	CHAPTER 3 FISH AND SHELLFISH	
	Notes:	
	1. The term "fish", as used in this chapter, does not include shellfish, or whales or other mammals. This chapter covers only fish and shellfish, live or dead, fit for human consumption.	
	2. In units A and B of this chapter, the term "whether or not whole" means if whole, or if processed by removal of heads, fins, viscera, scales, skins, or bones, or by filleting, division into pieces, or other cutting or slicing operations, but not minced or ground.	
	3. In units C and D of this chapter, the term "in oil" means packed in added oil or fat, or in added oil or fat and other substances, whether such oil or fat was introduced at the time of packing or prior thereto.	
	4. Live fish and shellfish imported to be used for purposes other than human consumption are covered by item 190.45 (see chapter 15F of section 1) and certain other fish and shellfish products are covered by chapters 14 and 15 of section 1.	
	Unit A Fish, Fresh, Chilled, or Frozen	
	Note:	
	1. In item 110.50 of this unit, "apparent consumption" shall be the sum of (a) the production in the United States of fresh and frozen fillets, steaks, and sticks of the named fish as defined on October 30, 1947, and as reported, by the United States Fish and Wildlife Service, (b) the quantity of such fillets, steaks, and sticks entered into

	Unit B Furskins	
	Notes:	
	1. This unit covers all furskins, except carroted furskins, but does not cover fur or hair which has been removed from the skin. (Carroted furskins and fur or hair removed from the skin are covered in unit D of chapter 15 of section 1.)	
	(a) the terms "furskins" or "skins" include the whole skins, or cuttings, heads, paws, tails, or other parts of whole skins, whether or not assembled into plates, mats, linings, strips, crosses, or similar forms, but do not cover such skins or parts of skins assembled in the rough form of garments, of parts or accessories of garments, or of other articles (see chapter 13B of section 7);  (b) the term "raw or not dressed" refers to raw, unprocessed skins, or to processed skins which have not been subjected to any processing which preserves them indefinitely in a pliant state; and  (c) the term "dressed" refers to skins which have	
	been subjected to any processing which preserves them indefinitely in a pliant state, whether or not dyed or otherwise processed and whether or not in condition ready for manufacture into garments or other articles.	
	3. If the wool or hair on any skins which have been released from customs custody under item 123.00 is removed from such skins otherwise tnan as an unsought residue resulting from the processing of the skins for use as furs, the entire importation shall be subject to duty at the appropriate rate for such wool or hair on the skin under unit C of chapter 1 of section 3, and for the purposes of this note, the clean content of such wool or hair shall be deemed to be 100%.

	CHAPTER 12 BEVERAGES	
	Notes: 1/	
	1. This chapter covers only products which are fit for use as beverages or for beverage purposes.	
	2. The standard for determining the proof of brandy and other spirits or liquors of any kind when imported is the same as that which is defined in the laws relating to internal revenue (26 U.S.C. (1970) 5002(a)(7) and (8), 5041(c)). The Secretary of the Treasury, in his discretion, may authorize the ascertainment of the proof of wines, cordials, or other liquors and fruit juices by distillation or otherwise, when it is impracticable to ascertain such proof by the means prescribed by existing law or regulations. 2/	
	3. The duties prescribed on products covered by this chapter are in addition to the internal-revenue taxes imposed under existing law or any subsequent Act. The duties imposed on products covered by this chapter which are subject also to internal-revenue taxes are imposed only on the quantities subject to such taxes; except that, in the case of distilled spirits transferred to the bonded premises of a distilled spirits plant under the provisions of section 5232 of the Internal Revenue Code of 1954, the duties are imposed on the quantity withdrawn from customs custody.	

<sup>1/</sup> Headnote 4 of TSUS schedule 1, part 12, is omitted.
2/ Headnote 2 of TSUS schedule 1, part 12, will be modified to conform to this note.

	Unit A Fruit Juices	
	Notes: 1/	
	1. The products described in this unit are covered herein whether or not containing ethyl alcohol, but any such products which are also described in unit C or D of this chapter are classifiable in said unit C or D.	
	<ol> <li>For the purposes of this unit, a concentrated juice may be in liquid, powdered, or solid form.</li> </ol>	
	3. For the purposes of this unit  (a) the term "gallon" in the "Rate of Duty" column of the provisions applicable to fruit juices means gallon of natural unconcentrated juice or gallon of reconstituted juice;  (b) the term "reconstituted juice" means the product which can be obtained by mixing the imported concentrate with water in such proportion that the product will have a Brix value equal to that found by the Secretary of the Treasury from time to time to be the average Brix value of like natural uncon- centrated juice in the trade and commerce of the United States; and  (c) the term "Brix value" means the refracto- metric sucrose value of the juice, adjusted to compensate for the effect of any added sweetening materials, and thereafter corrected for acid.	
	4. In determining the number of gallons of reconstituted fruit juice which can be obtained from a concentrate, the degree of concentration shall be calculated on a volume basis to the nearest 0.5 degree, as determined by the ratio of the Brix value of the imported concentrated juice to that of the reconstituted juice, corrected for differences of specific gravity of the juices. Any juice having a degree of concentration of less than 1.5 degrees (as determined before correction to the nearest 0.5 degree) shall be regarded as a natural unconcentrated juice.

	Notes: 1/  1. The term "wrapper tobacco", as used in this chapter, means that quality of leaf tobacco which has the requisite color, texture, and burn, and is of sufficient size for cigar wrappers, and the term "filler tobacco" means all other leaf tobacco.  2. The percentage of wrapper tobacco in a bale, box, package, or other shipping unit is the ratio of the number of leaves of wrapper tobacco in such unit to the total number of leaves therein. In determining such percentage for classification purposes, the appraiser shall examine at least 10 hands, and shall count the leaves in at least 2 hands, from each shipping unit designated for examination.  3. The dutiable weight of cigars and cigarettes includes the weight of all materials which are integral parts thereof.  4. Provisions for the free entry of certain samples of tobacco products are covered by chapter 5 of section 8.	

1/ Headnotes 5 and 6 of TSUS schedule 1, part 13, have been renumbered as notes 3 and 4, respectively, to this chapter.

	CHAPTER 15 OTHER ANIMAL AND VEGETABLE PRODUCTS	
	Unit A Products of American Fisheries	ı
ļ	Notes:	
	l. An American fishery, for the purposes of this unit, is a fishing enterprise conducted under the American flag by vessels of the United States on the high seas or in foreign waters in which such vessels have the right, by treaty or otherwise, to take fish or other marine products and may include a shore station operated in conjunction with such vessels by the owner or master thereof.	
	2. None of the items in this unit shall apply to fish, fresh, chilled, or frozen, in the form of fillets, steaks, or slices substantially free of bone (including any of the foregoing divided into sections), if produced in a foreign country, or its territorial waters, in whole or in part with the use of the labor of persons who are not residents of the United States.

	SECTION 2 WOOD AND PAPER; PRINTED MATTER	
	CHAPTER 1 WOOD AND WOOD PRODUCTS	
	Notes:	
	1. For the purposes of units D, E, and F of this chapter, hardboard shall be deemed to be wood.	
	2. The effectiveness of the proviso to section 304(a)(3)(J) of the Tariff Act of 1930 (19 U.S.C. 1304(a)(3)(J)), to the extent permitted by that section and as provided for in Schedules XX to the General Agreement on Tariffs and Trade, is suspended, with the result that sawed lumber and sawed timbers however provided for, telephone, trolley, electriclight, and telegraph poles of wood, and bundles of shingles, other than redcedar shingles, shall not be required to be marked to indicate the country of origin.	
	Unit A Rough and Primary Wood Products; Wood Waste	
	<u>Notes</u> :	
	l. The term "wood waste", as used in this unit, means residual material other than firewood resulting from the processing of wood, including scraps, shavings, sawdust, veneer clippings, chipper rejects and similar small wood residues, and also larger or coarser solid types of residual wood such as slabs, edgings, cull pieces, and veneer log cores.	
	2. The provisions for wood products in items 200.60 (poles, piles, and posts), 200.65 (laths), 200.75 (fence pickets, palings, and rails), 200.80 (railroad ties), and 200.85 (shingles and shakes) cover such products whether or not they have been treated with creosote or other wood preservatives.

	Unit B Lumber, Flooring, and Moldings	
	Notes:  1. This unit covers lumber, wood siding, wood flooring, wood moldings, and certain wood carvings and ornaments, including such products when they have been drilled or treated.  2. For the purposes of this chapter, the following terms have the meanings hereby assigned to them:  (a) Lumber: A product of a sawmill or sawmill and planing mill derived from a log by lengthwise sawing which, in its original sawed condition, has at least 2 approximately parallel flat longitudinal sawed surfaces, and which may be rough, dressed, or worked, as set forth below:  (i) rough lumber is lumber just as it comes from the saw, whether in the original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes;  (ii) dressed lumber is lumber which has been dressed or surfaced by planing on at least one edge or face; and	

Tariff item Description of products number Rate	of duty
(iii) worked lumber is lumber which has been matched (provided with a tongued-and-grooved joint at the edges or ends), shiplapped (provided with a rabbeted or lapped joint at the edges), or patterned (shaped at the edges), or patterned (shaped at the edges or on the faces to a patterned or molded form) on a matching machine, sticker, or molder. Edge-glued or end-glued wood over 6 feet in length and not over 15 inches in width shall be classified as lumber if such wood as a solid piece without glue joints would be deemed to be lumber as defined above.  (b) Softwood: Wood from trees of coniferous species (order Coniferae).  (c) Hardwood: Wood from trees of non-coniferous species.  (d) Drilled or treated: Drilled at intervals for nails, screws, or bolts, sanded or otherwise surface processed in lieu of, or in addition to, planing or working, or treated with creosote or other wood preservatives, or with fillers, sealers, waxes, oils, stains, varnishes, paints, or enamels, but not including anti-stain or other temporary applications mentioned in note & of this unit.  (e) Standard wood moldings: Wood moldings worked to a pattern and having the same profile in cross section throughout their length.  3. Lumber, including certain flooring provided for in this unit, is dutiable on the basis of "board measure" for which the unit of measurement is the board foot. For the purposes of this unit, a board foot is the quantity of lumber contained in, or derived (by drying, dressing, or working, or any combination of these processes) from, a piece of rough green lumber 1 inch in thickness, 12 inches in width, and I foot in length, or the equivalent of such piece in other dimensions.

	CHAPTER 5 BOOKS, PAMPHLETS, AND OTHER PRINTED AND MANUSCRIPT MATERIAL	
	Notes:	
	l. Except for decalcomanias, labels, flaps, and bands, all of which are covered by the provisions therefor in this chapter, regardless of the nature of the printing thereon, this chapter covers only printed matter consisting essentially of textual or pictorial matter produced by any printing process, and similar matter in manuscript or typewritten form. The text may be set forth in any language by means of any kind of characters. With the exceptions above indicated, this chapter does not cover any article in which printing is merely incidental to the primary use of the article or in which printing is employed mainly for coloration or to produce a decorative or novelty effect (see chapter 4 of this section).	
	2. For the purposes of this chapter  (a) the term "paper" includes paperboard; (b) the term "books" includes books, bound and not bound, and pamphlets; (c) the term "periodicals" embraces only paper-covered or unbound publications issued regularly at stated periods, such as weekly, monthly, or quarterly, and bearing the date of issue; and (d) the term "photographs" embraces only pictures other than motion pictures, produced on photosensitive materials, and includes positive and negative images on exposed, or exposed and developed, photographic film.	
	3. For the purpose of determining the classification of printed matter produced in whole or in part by a lithographic process, the thickness of such printed matter is that of the thinnest paper contained therein, except that the thickness of a permanently mounted lithograph is the combined thickness of the lithograph and its mounting.

	SECTION 3 TEXTILE FIBERS AND TEXTILE PRODUCTS	
	Notes: 1/	
	1. This section does not cover  (i) articles of unspun fibrous vegetable materials (see chapter 2B of section 2);  (ii) asbestos fibers, or yarns, fabrics, or other articles containing asbestos in significant amounts, i.e., articles in which asbestos is used in sufficient amounts to impart its peculiar characteristics or properties to the article (see chapter 1F of section 5);  (iii) wire, or wire cordage, screen, fencing, or other wire products (see chapters 2 and 3B of section 6); or  (iv) footwear, headwear, gloves, handbags, pillows, mattresses, and other articles of textile materials provided for in section 7.	
	2. For the purposes of this schedule  (a) the term "textile materials" means  (i) the fibers (cotton, other vegetable fibers, wool and hair, silk, and man-made fibers) provided for in chapter 1 of this section,  (ii) the yarn intermediates and the yarns provided for in chapter 1 and chapter 4 (elastic yarns) of this section,  (iii) the cordage provided for in chapter 2 and chapter 4 (elastic cordage) of this section,  (iv) the fabrics provided for in chapter 3 and chapter 4 of this section,  (v) braids, as defined in note 2(f), infra, and  (vi) except as provided by note 5, articles produced from any of the foregoing products;	

 $<sup>\</sup>underline{1}/$  Headnote 6 of TSUS schedule 3 is omitted and will be removed from the Tariff Schedules of the United States.

Tariff item number	Description of products	Rate of duty
	(b) the term "colored", as used in connection with textile materials or textile articles, means that they have been subjected to a process such as, but not limited to, dyeing, staining, painting, printing, or stenciling, in which color is imparted at any stage of manufacture to all or part of the fiber, yarn, fabric, or other textile article, except identification yarns and except marking in or on selvages;  (c) the term "wool", except as used in chapter 1C of this section, means wool or hair of the types covered by the said chapter 1C of this section, or any combinations thereof;  (d) the term "knit" means knit or crocheted;  (e) the term "yarns" includes threads, but does not include elastic yarns or any braids;  (f) the term "braids", as used in connection with textile materials or textile articles, includes all braids in the piece, whether of flat, tubular, or other construction, with or without cores, and whether braided from fibers, filaments (including tinsel wire and lame), yarns, cordage, textile fabrics, or any combination thereof;  (g) the term "burnt-out lace" means embroidery in which the base or ground (whether fabric, paper, or other material), having been removed chemically or by other means, is not visible; and  (h) a "lace" article or a "net" article is an article which (exclusive of any added ornamentation) is wholly or almost wholly or lace, including burnt-out lace, or wholly or lace, including burnt-out lace, or wholly or almost wholly of het, whether the lace or net preexisted or was formed in the process of producing the articles of textile materials, means fabrics and other articles of textile materials which are ornamented with —  (a) There or no or ordage, any of the foregoing introduced as needlework or otherwise, including —

Tariff item number	Description of products	Rate of duty
	(A) embroidery, and pile or tufting, whether wholly cut, partly cut, or not cut, and (B) other types of ornamentation, but not including functional stitching or one row of straight hemstitching adjoining a hem; (ii) burnt-out lace; (iii) lace, netting, braid, fringe, edging, tucking, or trimming, or textile fabric; (iv) applique and replique work, beads, bugles, spangles, bullions, or ornaments; or (v) any combination of the foregoing types or methods of ornamentation; (b) ornamentation of the types or methods covered hereby consists of ornamenting work done to a pre- existing textile fabric, whether the ornamentation was applied to such fabric — (i) when it was in the piece, (ii) after it had been made or cut to a size for particular furnishing, wearing apparel, or other article, or (iii) after it had actually been incorporated into another article, and if such textile fabric remains visible, at least in significant part, after ornamentation: Provided, That lace, netting, braid, fringe, edging, tucking, trimming or ornament shall not be required to have had a sepa- rate existence from the fabric or other article on which it appears in order to constitute ornamentation for the purposes of this note; and (c) applique work, beads, bugles, spangles, bullions, and other forms of nontextile ornamentation applied to a textile fabric or other article of textile materials shall be disregarded in determining the component material of chief value of such fabric or other article.  4. For the purposes of this schedule — (a) Except as specifically provided otherwise,	
	in determining the yarn count of fabrics, the warp and filling yarns, whether plied or not, shall be counted as they occur in the fabric.	

Tariff item number	Description of products	Rate of duty
	(b) In determining the component fibers of chief value in coated or filled, or laminated, fabrics and articles wholly or in part thereof, the coating or filling, or the nontextile laminating substances, shall be disregarded in the absence of context to the contrary.	
	5. For the purposes of chapters 5, 6, and 7 of this section and chapters 1 (except unit A), 4, and 12 of section 7, in determining the classification of any article which is wholly or in part of a fabric coated or filled, or laminated, with nontransparent rubber or plastics (which fabric is provided for in chapter 4C of this section), the fabric shall be regarded not as a textile material but as being wholly of rubber or plastics to the extent that (as used in the article) the nontransparent rubber or plastics forms either the outer surface of such article or the only exposed surface of such fabric.	
	6. For the purposes of this schedule, the term "Certified hand-loomed and folklore products" refers to hand-loomed fabrics of the cottage industry, handmade cottage industry products made of such hand-loomed fabrics, and traditional folklore handicraft textile products, provided such fabrics and products have been certified, in accordance with regulations issued by the Secretary of the Treasury, by an official of a government agency of the country where the fabrics or products were produced, to have been so made. 1/	
	7. With respect to fabrics provided for in chapter 3 (other than fabrics valued over \$2 per pound provided for in item 337.50) and in chapter 4 of this section, provisions for fabrics in chief value of wool shall also apply to fabrics in chief weight of wool (whether or not in chief value of wool). For the purposes of the preceding sentence, a fabric is in chief weight of wool if the weight of the wool component is greater than the weight of each other textile component (i.e., cotton, vegetable fibers except cotton, silk, man-made fibers, or other textile materials) of the fabric.

	8. In the case of each item in this schedule which contains a concession on any cotton, wool, or man-made fiber textile product as defined in the Arrangement Regarding International Trade in Textiles, as extended on December 14, 1977 (the Arrangement), if the Arrangement, or a substitute arrangement (including quantitative restrictions or bilateral agreements) determined by the President to be suitable, should cease to be in effect with respect to the United States before the full concession rate for such item has become effective, the President shall proclaim, effective within not more than 30 days after such cessation, the rate for such item existing on January 1, 1975. If subsequently the Arrangement, or a substitute arrangement (including quantitative restrictions or bilateral agreements) determined by the President to be suitable, should enter into force with respect to the United States, the President shall so proclaim and, effective not more than 30 days following such entry into force, the staging to the full concession rate for such item shall be resumed, but the period during which such higher rate was in effect shall be excluded as provided in general note 14 to this schedule. 1/

	CHAPTER 1 TEXTILE FIBERS AND WASTES; YARNS AND THREADS	
	Notes:	
	1. For the purposes of this chapter  (a) the term "waste" means all fiber, yarn, and thread wastes, including wastes obtained in the production of continuous and noncontinuous fibers, yarns, and threads, such as gin motes, scutcher waste (including tow), picker waste, card waste, top waste, comber waste (including noils), hackling waste (including tow), sliver waste, roving waste, ring waste, throwster (twister or plyer) waste, fly, sweepings, and willowed wastes, and including fiber, yarn, and thread wastes obtained in the production of other textile products (i.e., products other than fibers, yarns, or threads) or otherwise obtained; and  (b) the term "advanced waste" means any of the above-mentioned wastes which have been cleaned, bleached, colored, or otherwise advanced, and includes fibers recovered by cleaning (except willowing), degumming, carbonizing, cutting, pickering, garnetting or similar processes from any of the above-mentioned wastes or from textile clippings or articles, new or used, whether or not such fibers or the wastes from which recovered have also been otherwise advanced, but does not include fibers which have been carded, combed, or similarly processed, or reuseable yarns or threads.  2. Rags and scrap cordage are covered in chapter 7C of this section.

	Unit A Cotton	
	Notes:  1. The term "number", as applied to yarns in this	
	unit, means the number of 840-yard hanks of yarn in 1 pound. To determine the number of any yarn, whether single or plied, the actual yards per pound shall be divided by 840 and the quotient thereof multiplied by the number of plies in such yarn. Fractions in the resulting yarn number shall be disregarded.	
	2. In this unit, each of the rates of duty provided for yarns, wholly of cotton, not bleached, mercerized, colored, combed or plied (items 301.01 through 301.98, inclusive) is also the "base rate" for yarn of the same number covered by item 302 For citation purposes, the two blanks on the end of the latter item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 302.28" would be the citation for bleached, mercerized, colored, combed, or plied yarns, wholly of cotton, of number 28.	
	3. Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.	
	4. The United States reserves the right to modify or suspend the provisions of item 300.15 during any period when there is no limitation on the quantity of cotton provided for therein that may be imported into the United States. 1/

	Unit E Man-made Fibers	
	Notes:	
	1. The provisions of this unit do not cover  (i) metal filaments, strips, or fibers;  (ii) paper filaments, strips, or fibers;  (iii) natural rubber filaments, strips,  or fibers;  (iv) synthetic rubber strips (in continuous or noncontinuous form);  (v) nonmetallic mineral filaments,  strips, or fibers, except as set  forth in 2(c) infra;  (vi) sterile surgical sutures and suture  materials, provided for in chapter 13C  of section 4;  (vii) strings for musical instruments  (see chapter 3B of section 7);  (viii) fishing line put up and packaged  for retail sale (see chapter 5B of  section 7);  (ix) racket strings put up and packaged for retail sale (see chapter 5D  of section 7); or  (x) brush bristles provided for in	
	chapter 12C of section 7.  2. (a) For the purposes of this schedule, the term "man-made fibers" refers to the filaments, strips, and fibers covered in this unit.  (b) Subject to the limitations set forth in notes 1 and 3 of this unit, the respective provisions in this unit for filaments, strips, and fibers cover such articles whether they are formed by extrusion or by other processes from substances derived by man from cellulosic or noncellulosic materials by chemical processes, such as, but not limited to, polymerization and condensation.	

Tariff item number	Description of products	Rate of duty
	(c) The provisions of this unit applicable to grouped filaments and fibers include grouped glass filaments and glass fibers produced therefrom, suitable for the manufacture of yarns, cordage, or woven fabrics. For the purposes of the provisions of this schedule applicable to articles of man-made fibers, glass filaments and glass fibers shall be treated as man-made fibers only if they have been made into yarns or cordage, or if they are present in fabrics or other articles in the form of yarns or cordage.	
	(a) the term "filaments" embraces monofilaments, plexiform filaments, and grouped filaments, however produced;  (b) the term "monofilaments" embraces single filaments (including single filaments of laminated construction or produced from two or more filaments fused or bonded together), whether solid or hollow, whether flat, oval, round, or of any other cross-sectional configuration, which are not over 0.06 inch in maximum cross-sectional dimension;  (c) the term "plexiform filaments" embraces flexible filaments each of which consists of a net-	
	work or plexus of fine fibers and which are suitable for the manufacture of textiles;  (d) the term "strips" embraces strips (including strips of laminated construction), whether or not folded lengthwise, twisted, or crimped, which in unfolded, untwisted, and uncrimped condition are over 0.06 inch but not over one inch in width and are not over 0.01 inch in thickness;  (e) the term "grouped filaments and strips" embraces two or more filaments or strips, as defined in (a), (b), (c), and (d) of this note,	
	grouped together with the filaments or strips substantially parallel and not twisted, but the term does not include grouped filaments which have been subjected to processes such as twisting and untwisting, false twisting, crimping, and curling, and which are useable as yarns;

	Unit F Miscellaneous Textile Materials	
	Note:	
	1. For the purposes of this schedule  (a) the term "metalized yarns" means yarns, in chief value, but not wholly, of tinsel wire or lame; and  (b) the term "yarns, of paper" or "paper yarns" means paper which is in the form of strips not over	
	0.06 inch in width, or in the form of filaments made from strips by lengthwise rolling or folding, by twisting, or by similar processes, whether or not coated or impregnated with other materials, and which is suitable for making woven fabrics.

	· CHAPTER 2 CORDAGE	
	Note:	
	(a) the term "cordage" means assemblages of textile fibers or yarns, in approximately cylindrical form and of continuous length, whether or not bleached, colored, or treated, designed and chiefly used as an end product, and comprising cable, rope, cord, and twine, but the term does not include —  (i) yarns (see chapter 1 of this section),  (ii) braids or elastic articles (see chapter 4A of this section and chapter 1B of section 7);  (b) cordage "of stranded construction" is cordage composed of 3 or more strands composed of 2 or more yarns each, whether or not containing a core;  (c) the term "hard (leaf) fibers" means fibers obtained from the leaf or leaf stems of monocotyledonous plants (e.g., abaca, sisal, and henequen);  (d) the term "bleached, colored, or treated" means that the condition of the cordage or any of its constituent fibers or yarns has been affected by bleaching or coloring processes; by surface treatments such as polishing, glazing, coating, or filling; or by the application of grease or other nonfibrous substances (except oil) for any purpose, including rendering the cordage more able to withstand or repel fire, insects, rodents, mildew or rot;  (e) the term "binder twine and baler twine" (item 315.20) means a single-ply twine measuring over 150 but not over 750 feet per pound, containing 8 percent or more by weight of added nonfibrous substances such as oil, grease, or repellents, and chiefly used with harvesting machines or baling machines for binding or tying of grains or for baling hay, straw, and other fodder or bedding materials.

	CHAPTER 3 WOVEN FABRICS	
	Note:	
	l. This chapter covers all woven fabrics in the piece, of any width and with or without fast edges, including gauze and leno-woven fabrics, but does not include  (i) any woven fabrics which are specially provided for in the provisions of chapter 4 of this section;  (ii) certain wool fabric samples (see chapter 7A of this section); or  (iii) woven fabrics in item 748.10 of chapter 7B of section 7.	
	Unit A Woven Fabrics, of Cotton	
	Notes:	
	1. (a) In the ascertainment of the condition of the fabrics or yarms upon which the duties imposed upon cotton fabrics are made to depend, the entire fabric and all parts thereof shall be included.  (b) The term "number", as applied to woven fabrics of cotton, means the average yarm number of the yarms contained therein. In computing the average yarn number, the length of the yarm is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarm being measured as if continuous, and with the count being taken of the total single yarms in the fabric including the single yarms in any plied yarms. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes:	

Tariff item number	Description of products	Rate of duty
	$N = \frac{BYT}{840}$ , or $\frac{24T}{35Z}$ , or $\frac{2BT}{105Z}$ , or $\frac{3ST}{70}$	
	when:  N is the average yarn number, B is the breadth (width) of the fabric in inches, Y is the yards (linear) of the fabric per pound, T is the total single yarns per square inch, S is the square yards of fabric per pound, Z is the ounces per linear yard of fabric, and Z' is the ounces per square yard of fabric.	
	2. In this unit, each of the rates of duty provided for fabric, wholly of cotton, not fancy or figured, and not bleached and not colored (items 319.21 through 319.25 and items 320.01 through 320.98, both inclusive) is also the "base rate" for fabrics of the same average yarn number covered by items 319.27 and 319.29, and by items 321.— through 331.—, inclusive, respectively. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 324.45" would be the citation for woven fabrics, wholly of cotton, of number 45, fancy or figured, and bleached but not colored.	
	3. The term "fancy or figured", as used in this unit in relation to fabrics, means fabrics which have been woven with 2 or more colors or kinds of filling; with 8 or more harnesses; or with jacquard, lappet, or swivel attachments; or by any combination of these weaving methods.	
	4. With respect only to the fabrics provided for in items 319.21 through 319.25 and 320.01 through 320.98, none of the ad valorem rates of duty, or the ad valorem parts of the compound rates of duty, shall be less than the equivalent of  (i) 0.17 cent per number per pound for items 320.01 through 320.98; and  (ii) 0.22 cent per number per pound for items 319.21 through 319.25.

	CHAPTER 4 FABRICS OF SPECIAL CONSTRUCTION OR FOR SPECIAL PURPOSES; ARTICLES OF WADDING OR FELT; FISH NETS; MACHINE CLOTHING	
	Note:  1. This chapter covers certain textile fabrics and, in addition, certain other textile products. The provisions of unit B of this chapter and the provisions for "fish netting and fishing nets" in unit C hereof do not cover gauze and leno-woven fabrics. Woven textile fabrics not specially provided for in this chapter are provided for in chapter 3 of this section.  Unit A Knit, Pile, Tufted, and Narrow Fabrics; Braids, and Elastic Fabrics	
	Notes:  1. This unit provides for the named fabrics, braids, and elastic materials, when in the piece only. Any fabric described in this unit and also in unit B or C of this chapter is classifiable in the said unit B or C. This unit does not cover  (i) braids suitable for making or ornamenting headwear (see chapter 1B of section 7); or  (ii) rubber or plastics filaments  (see chapter 1E of section 3 and chapter 12B of section 7).	
	2. For the purposes of this schedule —  (a) the term "narrow fabrics" means  (i) woven or knit fabrics, not over  12 inches in width, with fast edges  (that is, with both edges made or  treated to prevent the fabric from  unraveling, by means of selvages,  stitching, gumming, fusing, or  simple hemming); or

	Unit A Handkerchiefs	
	Notes:	
	1. For the purposes of this unit  (a) the term "handkerchiefs" means textile articles designed to be worn on or carried on or about the person as articles of utility, for deco- rative purposes, or both, whether known as kerchiefs, handkerchiefs, neckerchiefs, scarves, or mufflers, which are square or approximately square in shape and do not exceed 24 inches in length or width (finished dimensions), or which, if not square or approximately square, fit wholly within a 24-inch square (finished dimensions); and  (b) the term "fancy or figured" means that the fabric from which the handkerchief was made was woven with two or more colors of kinds of filling; with eight or more harnesses; or with Jacquard, lappet, or swivel attachments; or by any combination of these weaving methods.	
	2. The average yarn number of cotton fabric in handkerchiefs is obtained in the manner prescribed in note 1(b) of chapter 3A of this section.

	SECTION 4 CHEMICALS AND RELATED PRODUCTS  Notes:	
	<ol> <li>This section does not include —         (i) any of the mineral products provided for in section 5;</li> <li>(ii) metal-bearing ores and other metal-bearing materials, provided for in chapter 1 of section 6; or</li> <li>(iii) metals provided for in chapter 2 of section 6.</li> </ol>	
	2. (a) The term "compounds", as used in this section, means substances occurring naturally or produced artificially by the reaction of two or more ingredients, each compound  (1) consisting of two or more elements,  (ii) having its own characteristic properties different from those of its elements and from those of other compounds, and  (iii) always consisting of the same elements united in the same proportions by weight with the same internal arrangement.  The presence of impurities which occur naturally or as incident to production does not in itself affect the classification of a product as a compound.  (b) The term "compounds", as used in this section, includes a solution of a single compound in water, and	
	in determining the amount of duty on any such compound subject to duty in this section at a specific rate, an allowance in weight or volume, as the case may be, shall be made for the water in excess of any water of crystallization which may have been in the compound.	
	3. (a) The term "mixtures", as used in this section, means substances consisting of two or more ingredients (i.e., elements or compounds), whether occurring as such in nature, or whether artificially produced (i.e., brought about by mechanical, physical, or chemical means), which do not bear a fixed ratio to one another and which, however thoroughly commingled,

	retain their individual chemical properties and are not chemically united. The fact that the ingredients of a product are incapable of separation or have been commingled in definite proportions does not in itself affect the classification of such product as a mixture.  (b) The term "mixtures", as used in this section, includes solutions, except solutions defined as compounds in note 2(b) of this section.

	CHAPTER 1 BENZENOID CHEMICALS AND PRODUCTS	
	Notes: 1/	
	1. Except as specifically set forth in the notes to other chapters of this section, all products described in this chapter shall be classified hereunder even if more specifically described elsewhere in this section. Any product described in both units B and C of this chapter shall be classified in unit C.	
	2. For the purposes of this chapter, the term "modi-fied benzenoid" describes a molecular structure having at least one six-membered heterocyclic ring which contains at least four carbon atoms and having an arrangement of molecular bonds as in the benzene ring or in the quinone ring, but does not include any such molecular structure in which one or more pyrimidine rings are the only modified benzenoid rings present.	
	3. With the exception of the natural products provided for in unit C, this chapter does not cover cyclic organic chemical products (such as, but not limited to, tannic, gallic and pyrogallic acids; estrone, estradiol, and corticosteroids; morphine, ergot, and cinchona alkaloids; rotenone; phenylalanine; tyrosine; epinephrine; and thymols) having a benzenoid, quinoid, or modified benzenoid structure, which are produced from animal or vegetable products in which such structure occurs naturally, unless such cyclic organic chemical products were obtained, derived, or manufactured in part from any product provided for in unit A, B or C of this chapter.	
	4. If any contracting party, a schedule of which is annexed to the protocol to which this schedule is annexed, makes representation to the United States in writing before July 31, 1979, that it considers a rate of duty applicable to any individual chemical or product in unit B or C of this chapter is, based on past import data for such chemical or product, inappropriate and nonrepresentative, and if the President finds that, during a representative period, such chemical or product was not valued by the United States for customs purposes on the basis of the American Selling Price and concurs in such representation, he may proclaim a modification of the relevant article descriptions to the extent necessary to provide for the application to such chemical or product of a rate of duty which he determines to be more appropriate and representative.

Tariff item number	Description of products	Rate of duty
	Unit B Industrial Organic Chemicals  Notes:  1. The provisions of items 402.00 to 406.63, inclusive, in this unit shall apply not only to the products described therein when obtained, derived, or manufactured in whole or in part from products described in unit A of this chapter, but shall also	
	apply to products of like chemical composition having a benzenoid, quinoid, or modified benzenoid structure artificially produced by synthesis, whether or not obtained, derived, or manufactured in whole or in part from products described in said unit A.	
	2. For the purpose of classification of merchandise provided for under items 402.36 to 406.63, inclusive, the following provisions shall govern:  (a) The term "derivatives" refers to only those derivatives which may be obtained by one or more of the following processes: Halogenation, nitration, nitrosation, or sulfonation, and is to be understood to include sulfonyl halides.	
	(b) A compound with functional groups described in two or more subclasses under items 402.36 to 406.63, inclusive, is to be classified in the latest applicable subclass. For example, 4-acetamido-2-aminophenol, which contains three functional groups, will be classified in 405.12 (Amides), rather than in 404.92 to 405.09, inclusive (Aminophenols), or in 404.84 to 404.90, inclusive (Amines), or in 403.51 (Phenols). When applicable, classification should be made in	
	accordance with the following principles:  (i) Salts of organic acids (including pheonols) with inorganic bases and salts of organic bases with inorganic acids are to be classified under the same superior heading as the organic acid or base; salts of organic acids with organic bases are to be classified either under	
	the superior heading which describes the functional groups present in the free acid or under the one which describes the functional groups present in the free base, whichever is listed later.	

Tariff item number	Description of products	Rate of duty
402.00 402.04 402.08	(ii) Esters of organic acids are to be classified either under the superior heading which describes the functional groups present in the free acid or under the one which describes the functional groups present in the free alcohol or phenol, whichever is listed later.  (iii) The above provisions apply also in cases where the component having the functional groups described under the later superior heading is not of benzenoid origin. For example, benzyl acetate is classified under carboxylic acids (404.24 to 404.47, inclusive) rather than under alcohols (403.45). 1/  Cyclic organic chemical products in any physical form having a benzenoid, quinoid, or modified benzenoid structure, not provided for in unit A or C of this chapter:  Anthracene having a purity of 30% or more by weight.  Carbazole having a purity of 65% or more by weight.  Naphthalene which after the removal of all water present has a solidifying point of	0.8¢ per lb. + 5.5% ad val. 0.8¢ per lb. + 6.1% ad val.

	Unit C Finished Organic Chemical Products  Notes: 1/  1. The provisions of this unit providing for products obtained, derived, or manufactured in whole or in part from products described in unit A or B of this chapter shall also apply to products of like chemical composition having a benzenoid, quinoid, or modified benzenoid structure artificially produced by synthesis, whether or not obtained, derived, or manufactured in whole or in part from products described in the said unit A or B.  2. The term "pesticides" in items 408.16 to 408.38, inclusive, means products, such as insecticides, rodenticides, fungicides, herbicides, fumigants, and seed disinfectants, chiefly used to destroy undesired animal or plant life.  3. The term "plastics materials" in items 408.44 to 409.18, inclusive, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which plasticizers, fillers, colors, or extenders may have been added. The term includes, but is not limited to, phenolic and other tar-acid resins, styrene resins, alkyd and polyester resins based on phthalic anhydride, coumarone-indene resins, urethane, epoxy, toluene sulfonamide, maleic, fumaric, aniline, and polyamide resins, and other synthetic resins. The plastics materials may be in solid, semi-solid, or liquid condition, such as flakes, powders, pellets, granules, solutions, emulsions, and other basic forms not further processed.	

 $<sup>\</sup>underline{1}/$  Headnotes 4, 5, and 6 of TSUS schedule 4, part 10, have been renumbered as notes 9, 10, and 11, respectively, to this unit.

	4. For the purpose of the classification of merchandise provided for under items 408.44 to 409.18, inclusive, the following provisions shall apply:  (a) The term "thermoplastic resins" means those materials in unfinished forms which in their final state as finished articles are capable of being repeatedly softened by increase of temperature and hardened by decrease of temperature.	
	(b) The term "thermosetting resins" (or thermosets) means those materials in unfinished forms which in their final state as finished articles are substantially infusible. Thermosetting resins are often liquids at some stage in their manufacture or processing and are cured by heat, catalysis, or other chemical means. After being fully cured, thermosets cannot be resoftened by heat.	
	(c) Copolymers and terpolymers not specially provided for shall be classified as if they consisted entirely of that monomer which is present in the largest amount by weight on a resin content basis (i.e., excluding the weight of plasticizers, liquid diluents, fillers, or other additives). Any polymer consisting of two or more monomers which are present in equal amounts shall be classified as if it consisted entirely of that monomer whose polymer is listed first under the thermoplastic or thermosetting resins, as appropriate. 1/	
	5. The term "paints and enamel paints" in this unit covers dispersions of pigments or pigment-like materials with a liquid (vehicle) which are suitable for application to surfaces as a thin layer, and which dry (harden) to an opaque, solid film. The vehicle of paints consists of drying oils or resins which bind the pigment particles together in the film; the vehicle of enamel paints is principally varnish. Paints and enamel paints may also contain thinners, driers, plasticizers, or other agents. 1/	

This note is not in the Tariff Schedules of the United States on June 30, 1979.

Tariff item number	Description of products	Rate of duty
	6. The term "varnishes" in this unit covers liquid surface-coating products which contain no pigments or pigmentlike materials, and which dry (harden) to a transparent or translucent film. Shellac varnishes are solutions of shellac or any other form of lac in a volatile solvent such as ethyl alcohol. Oleoresinous varnishes consist of resins dissolved in or reacted with a drying oil, to which thinners, driers, and plasticizers may be added. Cellulose-derivative varnishes (laquers) are solutions of cellulose nitrate or other cellulose derivatives in a volatile solvent. 1/  7. The term "stains" in this unit covers liquids containing transparent or semi-transparent pigments, dyes, or chemicals, chiefly used to deepen or otherwise alter the color of wood, but which will not obscure its grain, texture, or markings. 1/	
	8. For the purposes of this unit  (a) The term "surface-active agents" means synthetic organic compounds, or mixtures thereof, which function as surface tension modifiers and are chiefly used for any one or combination of the following purposes: as detergents, wetting agents, emulsifiers, dispersants, or foaming agents.  (b) The term "synthetic detergents" embraces formulated materials which are used chiefly for household, laundry, and industrial cleaning purposes, and which consist of one or more surface-active agents as the active ingredients in combination with colors, brighteners, perfumes, inert diluents, builders, and extenders such as inorganic salts, polyphosphates, polysilicates or sodium carboxymethylcellulose. 1/	
	9. The term "plasticizers" in item 409.34 means substances which may be incorporated into a material (usually a plastic, resin material, or an elastomer) to increase its softness, flexibility, workability, or distensibility.  10. The term "drugs" in this unit means those substances having therapeutic or medicinal properties and chiefly used as medicines or as ingredients in medicines.

nit relating to "colors, dyes, stains, and related products" (except products provided for in items 410.36 to 410.44, inclusive) —  (a) the specific duties shall be based on standards of strength which shall be established by the Secretary of the Treasury, and upon all importations of such articles which exceed such standards of strength the specific duty shall be computed on the weight which the article would have if it were diluted to the standard strength, but in no case shall any such articles of whatever strength be subject to a less specific duty than that provided in the respective items of this unit;  (b) in the enforcement of the foregoing provisions of this note the Secretary of the Treasury shall adopt a standard of strength for each dye or other product which shall conform as nearly as practicable to the commercial strength in ordinary use in the United States prior to July 1, 1914. If a dye or other product has been introduced into commercial use since said date then the standard of strength for such dye or other product shall conform as nearly as practicable to the commercial strength more than one commercial strength, then the lowest commercial strength in ordinary use. If a dye or other product was or is ordinarily used in more than one commercial strength, then the lowest commercial strength for such dye or other product. 1/  12. Any product described in two or more of the items under 411.32 to 412.70, inclusive, is to be classified in the first applicable item. 2/	

<sup>1/</sup> Headnote 6(b) and (c) of TSUS schedule 4, part 1C, are omitted. Headnote 6(d) of TSUS schedule 4, part 1C, is renumbered as note 11(b) to this unit.

	CHAPTER 2 CHEMICAL ELEMENTS, INORGANIC AND ORGANIC COMPOUNDS, AND MIXTURES	
	Notes:	
	<ol> <li>This chapter covers chemicals, except those provided for elsewhere in this section and those specially provided for in any of the other sections.</li> </ol>	
	2. For the purpose of this chapter, inorganic compounds (including salts) are compounds not containing carbon, except carbides and such carbon-containing compounds as inorganic cyanides and cyanates, metallic carbonates, and oxides of carbon which are inorganic in nature.	
	3. For the purpose of this chapter, organic com- pounds are compounds containing carbon except such carbon-containing compounds as carbides, inorganic cyanides and cyanates, metallic carbonates, and oxides of carbon.

	Unit C Inorganic Chemical Compounds  Note:  1. This unit does not include any organic compounds. For the purposes of this unit, inorganic compounds containing only one kind of cation are classifiable according to the cation constituent as indicated in the alphabetical listing set forth in this unit; and inorganic compounds containing two or more different kinds of cations are classifiable according to the cation constituent thereof first named in the alphabetical listing in this unit. Inorganic compounds, having no cations or none of the cation constituents of which are named in this unit, are covered by the provision for other inorganic compounds (item 423.00).

	CHAPTER 3 DRUGS AND RELATED PRODUCTS	
	Notes:  1. Any product described in this chapter which is a mixture containing as an ingredient any product described in chapter 1 of this section remains classifiable in chapter 3 unless the chapter 1 ingredient, as used in the mixture, imparts therapeutic or medicinal properties thereto. Notwithstanding the provisions of chapter 1 of this section, niacin, niacinamide, mesoinositol hexanicotinate, and pyridoxine (vitamin B6), regardless of source, are classifiable in chapter 3 of	
	this section.  2. For the purposes of this schedule, the term "drugs" means those substances, whether natural or synthetic, having therapeutic or medicinal properties and chiefly used as medicines or as ingredients in medicines.	
	(a) "natural substances" are those substances found in nature which comprise whole plants and herbs, anatomical parts thereof, vegetable saps, extracts, secretions and other constituents thereof; whole animals, anatomical parts thereof, glands or other animal organs, extracts, secretions and other constituents thereof, and which have not had changes made in their molecular structure as found in nature;  (b) a "synthetic substance" is a chemical compound made by the artificial combination of elements or radicals by any physical or chemical process;	
	(c) the term "crude", as used in relation to natural products, means any product which has not been advanced in value or improved in condition by shredding, grinding, chipping, crushing, distilling, evaporating, extracting, by artificial mixing with other substances or by any other process or treatment beyond that which is essential to its proper packing and the prevention of decay or deterioration pending manufacture; and

	(d) the term "advanced", as used in relation to natural products, means any product which has been advanced in value or improved in condition from its crude state by any mechanical or physical process whatever beyond that which is essential to its proper packing and the prevention of decay or deterioration pending manufacture, but does not include any product which has been artificially mixed with other substances or the molecular structure of which as found in nature has been changed.

	Chapter 4 SYNTHETIC RESINS AND PLASTICS MATERIALS; RUBBER	
	Unit A Synthetic Resins and Plastics Materials	
	Notes:	l
	l. This unit does not cover synthetic plastics materials provided for in chapter 1C of this section, but the addition of any product described in chapter 1 of this section to a synthetic plastics material described in this unit as an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer does not affect the classification of such synthetic plastics material in this unit.	
	2. The term "synthetic plastics materials", in this unit, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added. These products contain as an essential ingredient an organic substance of high molecular weight; are capable, at some stage during processing into finished articles, of being molded or shaped by flow; and are solid in the finished article. The term includes, but is not limited to, such products derived from esters of acrylic or methacrylic acid; vinyl acetate, vinyl chloride resins, polyvinyl alcohol, acetals, butyral, formal resins, polyvinyl ether and ester resins, and polyvinylidene chloride resins; urea and amino resins; polyethylene, polypropylene, and other polyalkene resins; siloxanes, silicones, and other organo-silicon resins; alkyd, acrylonitrile, allyl, and formaldehyde resins, and cellulosic plastics materials. These synthetic plastics materials may be in solid, semisolid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.

	1. This unit covers all rubber whether or not obtained, derived, or manufactured in whole or in part from any product described in chapter 1 of this section.	
	2. For the purposes of this schedule, the term "rubber" means a substance, whether natural or synthetic, in bale, crumb, powder, latex, or other crude form, which can be vulcanized or otherwise cross-linked, and which after cross-linking can be stretched at 68° F to at least three times its original length and which, after naving been stretched to twice its original length and the stress removed, returns within 5 minutes to less than 150 percent of its original length, and includes such substance whether or not containing fillers, extenders, pigments, or rubber-processing chemicals.

	CHAPTER 8 SURFACE-ACTIVE AGENTS: SOAP AND SYNTHETIC DETERGENTS	
	Note:	
	1. This chapter covers surface-active agents, soaps, and synthetic detergents, except those provided for in items 409.22, 409.26, 409.28 and 409.30 of chapter 1C of this section. This chapter also covers certain specified products which may or may not be surface-active agents. The addition of any product described in chapter 1 of this section to these products as a color, brightener, germicide, deodorizer, whitener, or scent does not affect their classification under this chapter (8).	
	Unit A Surface-Active Agents	
	Note:	
	1. The term "surface-active agents", as used in item 465.95 means synthetic organic chemical compounds, or mixtures thereof, which function as surface tension modifiers and are chiefly used for any one or combination of the following purposes: As detergents, wetting agents, emulsifiers, dispersants, or foaming agents.

	Unit A Dyeing and Tanning Products	
	Notes:  1. This unit covers only materials, extracts, decoctions, and other preparations suitable for coloring (including dyeing and staining) or for tanning. All the products provided for are of vegetable origin except cochineal (item 470.05) which is of animal origin.	
	2. For the purposes of this unit  (a) the term "crude or processed" means materials which are crude or which have been processed by shredding, grinding, chipping, crushing, or any similar process, but not otherwise processed; and  (b) the term "cutch" refers to products obtained from the Acacia catechu or Areca catechu trees.

	Unit C Inks, Paints, and Related Products	
	Notes:  1. The provision in this unit for artists', students', and children's pigments and paints assembled into sets (item 474.08) covers only pigments and paints assembled in such container and form, and with such assortment of articles, as to be suitable for sale at retail to artists, students, or children as a paint set, kit, or color outfit.  2. The term "paints and enamel paints" in this unit covers dispersions of pigments or pigment-like materials with a liquid (vehicle) which are suitable for application to surfaces as a thin layer, and which dry (harden) to an opaque, solid film. The vehicle of paints consists of drying oils or resins which bind the pigment particles together in the film; and the vehicle of enamel paints is principally varnish. Paints and enamel paints may also contain thinners, driers, plasticizers, or other	
	3. The term "varnishes" in this unit covers liquid surface-coating products which contain no pigments or pigmentlike materials, and which dry (harden) to a transparent or translucent film. Shellac varnishes are solutions of shellac or any other form of lac in a volatile solvent such as ethyl alcohol. Oleoresinous varnishes consist of resins dissolved in or reacted with a drying oil, to which thinners, driers, and plasticizers may be added. Cellulose-derivative varnishes (lacquers) are solutions of cellulose nitrate or other cellulose derivatives in a volatile solvent.

CHAPTER 10 PETROLEUM, NATURAL GAS, AND	
PRODUCTS DERIVED THEREFROM	
Notes:  1. Any product described in this chapter and also in chapter 1 of this section is classifiable in said chapter 1, except fuel oils, motor fuel, and lubricating oils and greases, containing by weight not over 25 percent of any product described in said chapter 1. This chapter does not cover  (i) paraffin and other petroleum waxes  (see chapter 13B of this section), or  (ii) petroleum asphalts (see chapter 1J of section 5).	
2. For the purposes of this chapter  (a) "Reconstituted crude petroleum" (items 475.05 and 475.10) is a product which is essentially the equivalent of crude petroleum and which is made by adding fuel oil, naphtha, or other petroleum fractions to crude or topped crude petroleum; and  (b) "Motor fuel" (item 475.25) is any product derived primarily from petroleum, shale, or natural gas, whether or not containing additives, which is chiefly used as a fuel in internal-combustion or other engines.	
3. For the purposes of items 475.65 and 475.70 of this chapter  (a) a product is considered to be in liquid form if  (i) the penetration is more than 350 units (35 millimeters) when tested by the procedure and equipment specified in American Society of Testing Materials (ASTM) Designation: D-5 with the use of a 50-gram load for 1 second at 77° F, or when tested by a procedure which provides equivalent results, and

	1. This unit covers certain crude minerals commonly used for making abrasives and abrasive articles (items 519.01 through 519.17, inclusive) but these minerals are classifiable in this unit even if they are not of abrasive quality. This unit also covers certain minerals and artificial abrasives in forms suitable for use as abrasives or for abrasive purposes (items 519.31 through 519.37, inclusive). The remaining provisions of this unit apply to papers, cloths, stones, and other articles which are cut or fashioned from natural stone or made from natural or artificial abrasive materials usually with the use of glues, resins, rubber or other binding materials, and which are designed and used for grinding, sharpening, smoothing, polishing, trueing, cutting, or similar purposes. The provisions of this unit do not cover —  (i) sand (see unit C of this chapter), unless made up into abrasive articles; (ii) natural or synthetic diamond dust or powder (see unit H of this chapter); (iii) crushed or powdered glass (see chapter 3 of this section), unless made up into abrasive articles; (iv) cosmetics and other toilet preparations (see chapter 7B of section 4);

	CHAPTER 2 CERAMIC PRODUCTS	
	Notes:	
	<ol> <li>This chapter covers ceramic wares, and articles of such wares and, in addition, certain unshaped refractory material (unit A) closely related thereto.</li> </ol>	
	(a) a "ceramic article" is a shaped article having a glazed or unglazed body of crystalline or substantially crystalline structure, which body is composed essentially of inorganic nommetallic substances and either is formed from a molten mass which solidifies on cooling, or is formed and subsequently hardened by such heat treatment that the body, if reheated to pyrometric cone 020, would not become more dense, harder, or less porous, but does not include any glass article;  (b) the term "earthenware" embraces ceramic ware, whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient and will absorb more than 3.0 percent of its weight of water;  (c) the term "stoneware" embraces ceramic ware whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient, is not commonly white, will absorb not more than 3.0 percent of its weight of water, and is naturally opaque (except in very thin pieces) even when fully vitrified;  (d) the term "subporcelain" embraces fine-grained ceramic ware (other than stoneware), whether or not glazed or decorated, having a fired body which is white (unless artifically colored) and will absorb more than 0.5 percent but not more than 3.0 percent of its weight of water;  (e) the terms "chinaware" and "porcelain" embrace fine-grained ceramic ware (other than stone-ware), whether or not glazed or decorated, having a body which is white (unless artificially colored) and will not absorb more than 0.5 percent of its weight of water;  (e) the terms "chinaware" and "porcelain" embrace fine-grained ceramic ware (other than stone-ware), whether or not glazed or decorated, having a body which is white (unless artificially colored) and will not absorb more than 0.5 percent of its weight of water;	

### Part I (continued)

Tariff item number	Description of products	Rate of duty
	(f) the term "bone chinaware" embraces chinaware or porcelain the body of which contains by weight 25 percent or more of calcined bone;  (g) the term "nonbone chinaware" embraces chinaware or porcelain other than bone chinaware;  (h) the term "coarse-grained", as applied to ceramic ware, embraces such wares having a body made of materials none of which had been washed, ground, or otherwise beneficiated;  (i) the term "fine-grained", as applied to ceramic wares, embraces such wares having a body made of materials any of which had been washed, ground, or otherwise beneficiated; and  (j) the term "body" includes any engobe or body slip, except engobe or body slip applied to the body as a decoration; and  (k) the water absorption of a ceramic body shall be determined by ASTM test method designated C373-56 1/(except that test specimens may have a minimum weight of 10 grams, and may have one large surface glazed).	
	Unit A Refractory and Heat-Insulating Articles	
	Notes:  1. This unit does not cover ceramic electrical ware (see unit D of this chapter).  2. For the purposes of this unit, "a heating article", whether shaped or not shaped, is one having a bulk density not over 75 pounds per cubic foot and designed to impede or resist the flow of heat at temperatures above 1600° F.  3. For the purposes of this unit, "a refrac-	
	tory article", whether shaped or not shaped, is one having a bulk density over 75 pounds per cubic foot and designed to be used to resist temperatures above

	Unit C Table, Kitchen, Household, Art and Ornamental Pottery	
	Notes: 1/	
	l. This unit covers ceramic articles chiefly used for preparing, serving, or storing food or beverages, or food or beverage ingredients; and certain smokers', household, and art and ornamental articles of ceramic ware. This unit does not cover —  (i) smokers' articles provided for in chapter 9B of section 7;  (ii) other articles specifically provided for in section 7 or elsewhere in this schedule.	
	2. For the purposes of this unit  (a) the term "available in specified sets" (items 533.22, 533.24, 533.62, and 533.64) embraces plates, cups, saucers, and other articles chiefly used for preparing, serving, or storing food or beverages, or food or beverage ingredients, which are sold or offered for sale in the same pattern, but no article is classifiable as being "available in specified sets" unless it is of a pattern in which at least the articles listed below in (b) of this note are sold or offered	
	for sale.  (b) if each of the following articles is sold or offered for sale in the same pattern, the classification hereunder in items 533.22, 533.24, 533.62, or 533.64, of all articles of such pattern shall be governed by the aggregate value of the following articles in the quantities indicated, as determined by the appropriate customs officer under section 402 of the Tariff Act of 1930 (19 U.S.C. (1970) 1401a), as amended, whether or not such articles are imported in the same shipment:  12 plates of the size nearest to 10.5

	SECTION 6 METALS AND METAL PRODUCTS	
	Notes:	
	1. This section does not cover	
	<ul> <li>(i) chemical elements (except thorium and uranium) and isotopes which are usefully radioactive (see chapter 13B of section 4);</li> <li>(ii) the alkali metals, i.e., cesium, lithium, potassium, rubidium, and sodium (see chapter 2A of section 4); or</li> <li>(iii) certain articles and parts thereof, of metal, provided for in section 7 and elsewhere.</li> </ul>

	CHAPTER 1 METAL-BEARING ORES AND OTHER METAL-BEARING MATERIALS	
	Notes:  1. This chapter covers metal-bearing ores, and certain other metal-bearing materials. This chapter does not cover  (a) pigments or fertilizers (see section 4, chapters 9B and 11, respectively), or chemical compounds (see section 4);  (b) slag cements, mineral wools, dolomite, cryolite, chiolite, or alunite, magnesite, or calcined bauxite (see section 5, chapter 1);  (c) precious and semiprecious stones (see section 5, chapter 1H); or  (d) metal waste and scrap, native metals separated from their gangues or matrices, or other metals essentially in a metallic state (see chapter 2	
	of this section).  2. For the purposes of this chapter  (a) the term "metal-bearing ores" embraces only metalliferous minerals, whether crude or concen- trated (by crushing, flotation, washing, or by other physical or mechanical separation processes which do not involve substantial chemical change), and roasted or sintered iron, lead, copper, manganese, and zinc concentrates, from which precious metals or base metals, as defined in note 2 of this section, are commercially obtained, including metals obtained directly in unalloyed form, in the form of alloys, or in the form of chemical compounds;  (b) the term "other metal-bearing materials of a type commonly used for the extraction of metal or as a basis for the manufacture of chemical com- pounds" embraces ash, slag, dross, scale, mattes, speiss, skimmings, flue dust, fumes, refinery slimes, residues, and all other materials (except metal- bearing ores, as above defined, and the dross or residuum from burnt pyrites) of a type from which precious metals or base metals, as defined in note 2 of this section, are commonly obtained (either as

	the result of a further processing of the materials as such, or as a result of the addition of the materials as alloying materials to other materials being processed), including metals obtained directly in unalloyed form, in the form of alloys, or in the form of chemical compounds;  (c) lead plants are pyrometallurgical reduction facilities whose principal production by weight, exclusive of waste materials and by-products, consists of lead bullion;  (d) copper plants are pyrometallurgical reduction facilities whose principal production by weight, exclusive of waste materials and by-products, consists of blister copper, black copper, anode copper or fire-refined copper;  (e) zinc plants are facilities whose principal production by weight, exclusive of waste materials and by-products, consists of unwrought zinc metal, zinc pigments, zinc compounds, or zinc fume; and  (f) other plants are all facilities which do not fall within the foregoing definitions of lead plants, copper plants, and zinc plants.  3. The duties imposed under item 602.10, 602.20,	
	602.28, or 602.30 of this chapter on the copper, lead, or zinc contained in metal-bearing ores are cumulative duties which apply in addition to the duties, if any, otherwise imposed on such ores.  4. Dutiable Metal Content of Ores and Other Materials: (a) The specific rates of duty imposed under the provisions of this chapter on the metal content of ores and other materials shall apply to the quantity of metal contained therein as determined by chemical analysis without deductions, whether recovered as metals, as alloys, or as chemical compounds or used directly in the manufacture of articles, except as hereinafter provided in this note.  (b) Allowable Absolute Deductions for Losses on Copper, Lead, or Zinc Content: With respect to ores or other materials provided for in this chapter which are subject to duty at specific rates on their copper, lead, or zinc content, absolute deductions from the respective quantities of each of such metal

	CHAPTER 2 METALS, THEIR ALLOYS, AND THEIR BASIC SHAPES AND FORMS	
	Notes:	
	Notes:  1. This chapter covers precious metals and base metals (including such metals when they are chemically pure), their alloys, and their so-called basic shapes and forms, and, in addition, covers metal waste and scrap. Unless the context requires otherwise, the provisions of this chapter apply to the products described by whatever process made (i.e., whether rolled, forged, drawn, extruded, cast or sintered) and whether or not such products have been subjected to treatments to improve the properties or appearance of the metals or to protect them against rusting, corrosion or other deterioration. These treatments include annealing, tempering, case-hardening and similar heat-treatments or nitriding; descaling, pickling, scraping, scalping and other processes to remove oxidation scale and crust; rough coating with oil, tar, grease, red lead, or other material to prevent rusting; polishing, burnishing, glazing, artificial oxidation, phosphatizing, and other finishing treatments; metallization by cementation, by electroplating, by immersion in a bath of molten metal, or by other means; coating with enamel, paint, lacquer, or other nonmetallic substances; and cladding. This chapter does not include —  (i) insulated electric conductors (see chapter 5 of this section); (ii) milliners' wire and other wire covered with textile or other nonmetallic material (see chapter 3B of this section); (iii) leaf and foil (see chapter 3C of this section); (iv) other articles specially provided for elsewhere in this schedule, or parts of articles.	

Tariff item number	Description of products	Rate of duty
iumber	2. Alloys (a) For the purposes of this schedule, alloys are defined and classifiable as hereinafter set forth. Alloys are metallic substances consisting of two or more metals, or of one or more metals and one or more non-metals, intimately united, usually by having been fused together and which may or may not have been dissolved in each other when molten; they include sintered mixtures of metal powders and heterogeneous intimate mixtures obtained by fusion, but do not include substances in which the total weight of the metals does not equal or exceed the total weight of the non-metal components.  (b) Precious-metal alloys are alloys which contain 2 percent or more by weight of one or more metals of the platinum group, of gold, or of silver. Precious-metal alloys are classifiable as  (i) alloys of platinum, if they contain  2 percent or more by weight of one or more metals of the platinum group;  (ii) alloys of gold, if they contain  2 percent or more by weight of gold, but contain no metal of the platinum group or less than 2 percent by weight thereof; and  (iii) alloys of silver, if they contain  2 percent or more by weight of silver, and are not alloys of platinum or alloys of gold, as defined in (b)(i) and (b)(ii), respectively, of this note.  (c) Base-metal alloys, as defined in (b) of this note. Base-metal alloys are classifiable as  (i) alloys of that base metal which predominates by weight over each of the other metallic elements contained therein, except as specified in (c)(ii) of this note; and  (iii) ferroalloys (as defined in note 2(e) of unit B of this chapter or master alloys (as defined in note 2(b) of unit	
	C of this chapter) under their respective headings in unit B or C of this chapter, regardless of the base metal therein which predominates by weight.	

Tariff item number	Description of products	Rate of duty
	(d) In this schedule, unless the context requires otherwise, a provision for a specific metal includes that metal and its alloys.  3. For the purposes of this chapter, unless the context requires otherwise —  (a) the term "unwrought" refers to metal, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot, and similar primary forms, but does not cover rolled, forged, drawn, or extruded products, tubular products, or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping, or descaling;  (b) the term "waste and scrap" refers to materials and articles of metal which are second-hand or waste or refuse, or are obsolete, defective or damaged, and which are fit only for the recovery of the metal content or for use in the manufacture of chemicals, and does not include metal in unwrought form or metal-bearing materials provided for in chapter 1 of this section;  (c) the term "wrought", as applied to metal products other than wrought iron, refers to products which have been rachined or processed otherwise than by simple trimming, scalping, or descaling;  (d) the term "clad", as applied to metal products, refers to such products with wo or more layers of metal of different colors or natures which have been associated or bonded together by forging, hammering, rolling, or other mechanical or thermic process to insure welding or molecular interpenetration of the surfaces in contact; and  (e) the term "pipes and tubes and blanks therefor" covers tubular products, including hollow bars and hollow billets but not including hollow drill steel, of any cross-sectional configuration, by whatever process made, whether seamless, brazed, or welded and whether with an open or lock seam or joint.	

Tariff item number	Description of products	Rate of duty
	4. No allowance or reduction of duties for partial damage or loss in consequence of discoloration or rust occurring before importation shall be made upon iron or steel or upon any article of iron or steel.	
	Unit A Precious Metals	
	Notes:	
	l. This unit does not cover  (a) base metals coated or plated with precious metal or articles thereof; or  (b) jewelry, parts of jewelry, and other articles and parts specially provided for elsewhere in this section or in section 7.	
	2. For the purposes of this schedule  (a) the term "platinum" refers to platinum and other metals of the platinum group (iridium, osmium, palladium, rhodium, and ruthenium), separately or together, and the term "the metal platinum" refers to the metal platinum alone;  (b) the term "semimanufactured" refers to wrought metal products in the form of bars, rods, sections, plates, sheets, strips, wire, tubes,	
	pipes, and hollow bars, and to powder (other than primary metal in powder form);  (c) the term "rolled", as used in regard to precious metals, means material made with a metal	
	base upon one or more surfaces of which a covering of precious metal is affixed by soldering, brazing, welding, hot-rolling, or similar mechanical methods, and also includes base metal inlaid with precious metal.

3. Forms and Condition of Iron or SteelFor the purposes of this unit, the following terms have the meanings hereby assigned to them:  (a) Ingots: Castings resulting from the solidification of molten steel and having a columnar form suitable for working by rolling or forging.  (b) Blooms and billets: Semifinished products generally of rectangular or circular cross section, having a length several times greater than the maximum cross-sectional dimension, and, if rectangular a width less than \(^1\) times the thickness. A bloom is at least 36 square inches in cross-sectional area; a billet is less than 36 square inches but not less than 3 square inches in cross-sectional area.  (c) Slabs and sheet bars: Semifinished products of rectangular cross section, having a width of at least \(^1\) times the thickness. A slab is not less than 2 inches in thickness; a sheet bar is less than 2 inches in thickness.  (d) Bars: Products of solid section not conforming completely to the respective specifications set forth herein for blooms, billets, slabs, sheet bars, wire rods, plates, sheets, strip, wire, rails, joint bars, or tie plates, and which have cross sections in the shape of circles, segments of circles, ovals, triangles, rectangles, hexagons, or octagons. Deformed concrete reinforcing bars are hot-rolled steel bars, of solid cross section, having deformations of various patterns on their surfaces.  (e) Hollow drill steel: A hollow steel product in any cross section suitable for use in making mining drills or mining drill rods, with the largest internal cross-sectional dimension not greater than one-third of the largest external cross-sectional dimension.  (f) Wire rods: A coiled, semifinished, hot-rolled product of solid cross section, approximately round in cross section, not under 0.20 inch nor over 0.74 inch in diameter. Number -	(g) Plates and sheets: Plates are flat rolled products whether or not corrugated or crimped, in coils or cut to length, 0.1875 inch or more in thickness and, if not cold rolled, over 8 inches in width, or, if cold rolled, over 12 inches in width. Sheets are flat rolled products whether or not corrugated or crimped, in coils or cut to length, under 0.1875 inch in thickness and over 12 inches in width. For the purposes of this unit —  (i) the term "black plate" refers to cold-rolled steel sheets, not coated, under 0.01½ inch in thickness;  (ii) the term "tin plate and tin coated sheets" refers to tin coated sheets" refers to tin coated sheets" refers to steel sheets coated with terne metal (a lead-tin alloy).  (h) Strip: A flat rolled product whether or not corrugated or crimped, in coils or cut to length, under 0.1875 inch in thickness, and, if cold rolled, over 0.50 inch but not over 12 inches in width, or, if not cold rolled, not over 12 inches in width, or, if not cold rolled, not over 12 inches in width, or, if not cold rolled, not over 12 inches in width.  (i) Wire: A finished, drawn, non-tubular product, of any cross-sectional configuration, in coils or cut to length, and not over 0.703 inch in maximum cross-sectional dimension. The term also includes a product of solid rectangular cross section, in coils or cut to length, with a cold-rolled finish, and not over 0.25 inch thick and not over 0.50 inch wide.  (j) Angles, shapes, and sections: Products which do not conform completely to the respective specifications set forth herein for blooms, billets, slabs, sheet bars, bars, wire rods, plates, sheets, strip, wire, rails, joint bars, or tie plates, and do not include any tubular products.  (k) Rails: Hot-rolled steel products, weighing not less than 8 pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway, and crane runway applications. Rails may be punched or not punched.

	(1) Joint bars: Hot-rolled steel products designed to connect the ends of adjacent rails in track. Joint bars are usually punched or slotted.  (m) Tie plates: Hot-rolled steel products used to support rails in track, to maintain track gauge and protect the ties. Tie plates are punched to provide holes for spikes and have one or two shoulder sections as rail guides.  4. Additional duties: Iron or steel products which contain, by weight, one or more of the follow- ing elements in the quantity, by weight, respectively indicated:  over 0.2 percent of chromium, or over 0.1 percent of molybdenum, or over 0.3 percent of tungsten, or over 0.1 percent of vanadium, are subject to additional cumulative duties as pro- vided for in items 606.00, 606.02, 606.04, and 606.06, but these duties apply only with respect to products covered by provisions which make specific reference to this note in the "Rate of Duty" column.

	Unit C Copper	
	Notes:	
	1. This unit covers copper, its alloys, and their so-called basic shapes and forms, and in addition covers copper waste and scrap.	
	2. For the purposes of this schedule, the following terms have the meanings indicated:  (a) Alloys of copper: Copper-base alloys or metals in which the copper content is, by weight, less than 99.3 percent, but not less than any other metallic element. For the purposes of this unit  (i) nickel silver is an alloy of copper which contains by weight 5 percent or more of zinc and 5 percent or more of nickel, with or without small quantities of other elements;  (ii) brass is an alloy of copper (not including nickel silver) in which zinc is the principal alloying element, with or without small quantities of other elements;  (iii) cupro-nickel is an alloy of copper in which nickel is the principal alloying element and which does not contain by weight over 2 percent of any other single element.  In the absence of context which requires otherwise, the term "copper", wherever used in this schedule, includes alloys of copper.	
:		

(b) Master alloys: Alloys of copper with other materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of nonferrous metals. For the purposes of this unit  (i) manganese copper is a master alloy which contains copper and manganese, in which the manganese content ranges by weight from 5 to 15 percent, with copper the balance; and  (ii) phosphor copper is a master alloy which contains phosphorus and copper, in which the phosphorus content ranges by weight from 5 to 16 percent, with copper the balance.  3. For the purposes of this unit, the following terms have the meanings indicated:  (a) Bars and plates: Products of solid rectangular cross section over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Bars are not over 12 inches in width and	Tariff item number	Description of products	Rate of duty
(b) Sheets and strips: Products of solid rectangular cross section not over 0.188 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 20 inches in width; strips are not over 20 inches in width and do not include flat wire, as defined in (d) below.  (c) Rods: Products of round, half-round, quarterround, oval, half-oval, triangular, pentagonal, hexagonal, octagonal, or decagonal solid cross section, in straight lengths or in coils, and which if in coils are over 0.375 inch in maximum cross-sectional dimension.  (d) Wire: A non-tubular product of any cross-sectional configuration, which if flat is in coils or straight lengths, not over 1.25 inches in width, not over 0.188 inch in thickness, and has all surfaces rolled or drawn, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils.		materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of nonferrous metals. For the purposes of this unit  (1) manganese copper is a master alloy which contains copper and manganese, in which the manganese content ranges by weight from 5 to 45 percent, with copper is a master alloy which contains phosphorus and copper, in which the phosphorus content ranges by weight from 5 to 16 percent, with copper the balance.  3. For the purposes of this unit, the following terms have the meanings indicated:  (a) Bars and plates: Products of solid rectangular cross section over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Bars are not over 12 inches in width.  (b) Sheets and strips: Products of solid rectangular cross section not over 0.188 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 12 inches in width.  (c) Rods: Products of round, half-round, quarterround, oval, half-oval, triangular, pentagonal, hexagonal, oval, half-oval, triangular, pentagonal, hexagonal, octagonal, or decagonal solid cross section, in straight lengths or in coils, and which if in coils are over 0.375 inch in maximum cross-sectional dimension. 	(e) Angles, shapes, and sections: Products which do not conform completely to the respective definitions set forth in this note for bars, plates, sheets, strip, rods, or wire, and do not include any tubular products.  4. For the purposes of this unit, any continuous cast product, whether or not machined or otherwise processed, which is substantially comparable to, and suitable for the same general purposes as, a wrought product provided for in this unit shall be classified under the same provision and at the same rate as such wrought product, notwithstanding the provisions of notes 3(a) and 3(c) of this chapter.	
	5. Determination of Market Price of Copper for Rate of Duty Purposes (a) In this unit, the rate of duty column has been divided into two columns, viz., A and B. The rates of duty in column A apply when the market price of copper is 24 cents or more per pound, and the rates of duty in column B apply when the market price of copper is under 24 cents per pound.  (b) For the purposes of the provisions of items 602.28, 602.30, and 603.49 through 603.55 in chapter 1 of this section relating to copper-bearing materials, and of the provisions of this unit, the market price of copper is the average market price per pound for one calendar month of electrolytic copper in standard shapes and sizes, delivered Connecticut Valley, as determined by the United States International Trade Commission and reported to the Secretary of the Treasury in accordance with procedures set forth below.  (c) The market price of copper, as defined above, shall be considered to be below 24 cents per pound only on and after the 20th day after the date of a report by the United States International Trade Commission to the Secretary of the Treasury that it has determined that	
	Secretary of the Treasury that it has determined that the said market price has been below 24 cents per pound for one calendar month.  (d) After any report by the United States International Trade Commission to the Secretary of the Treasury as provided for in (b) above, the said market price shall be considered as not being below 24 cents per pound only on and after the 20th day after the date of a report by the said Commission to the said Secretary that it has determined that the said market price has been 24 cents or more per pound for one calendar month.

	(e) Determinations by the said Commission of the market price of electrolytic copper shall be based upon sources commonly resorted to by the buyers of copper in the usual channels of commerce, including, but not limited to, quotations of the market price for electrolytic copper, in standard shapes and sizes, delivered Connecticut Valley, reported by the Engineering and Mining Journal's "Metal and Mineral Markets".		
	6. The deductions provided for in note 4(b) of chapter 1 of this section shall apply to cement copper and copper precipitates (item 612.02) subject to the conditions specified in note 4 of said chapter 1.

	Unit D Aluminum	
	Notes:	
	This unit covers aluminum, its alloys, and their so-called basic shapes and forms and also covers aluminum waste and scrap.	
	2. Alloys of aluminum: For the purposes of this schedule, alloys of aluminum are metals in which the aluminum content is, by weight, less than 99.0 percent, but not less than any other metallic element. Aluminum silicon is an alloy of aluminum containing not less than 25 percent of silicon. In the absence of context which requires otherwise, the term "aluminum", wherever used in this schedule, includes alloys of aluminum.	
	3. For the purposes of this unit, the following terms have the meanings indicated:  (a) <u>Bars</u> : Products of solid rectangular cross section, 0.25 inch or more in thickness and over 0.375 inch but not over 12 inches in width, in coils or cut to length; and products of solid hexagonal or octagonal cross section, 0.375 inch or more in thickness (measuring the perpendicular distance between opposite faces) in coils, or of any thickness in straight lengths.  (b) <u>Rods</u> : Products of solid round cross section, which, if 0.375 inch or more in diameter, are in coils or cut to length, and which, if under 0.375 inch in diameter, are in straight lengths.  (c) <u>Plates</u> , sheets, and strips: Products of solid rectangular cross section in coils or out to	
	solid rectangular cross section, in coils or cut to length, whether or not corrugated or crimped. Plates are 0.25 inch or more in thickness and over 12 inches in width; sheets and strip are under 0.25 but not under 0.006 inch in thickness.  (d) Wire: A product of solid round, rectangular, hexagonal, or octagonal cross section, in coils, whose diameter, width, or perpendicular distance between opposite faces is less than 0.375 inch.  (e) Angles, shapes, and sections: Products which do not conform completely to the respective definitions set forth in this note for bars, plates, sheets, strips, rods, or wire and do not include any tubular products.

In the absence of context which requires otherwise, the term "nickel", wherever used in this schedule, includes alloys of nickel.	
	3. For the purposes of this unit, the following terms have the meanings indicated:  (a) Bars and plates: Products of solid rectangular cross section over 0.25 inch in thickness, in coils or cut to length. Bars are not over 12 inches in width and plates are over 12 inches in width.  (b) Sheets and strips: Products of solid rectangular cross section not over 0.25 inch but over 0.006 inch in thickness, in coils or cut to length, whether	
	or not corrugated or crimped. Sheets are over 14 inches in width; strips are over 0.5 inch but not over 14 inches in width.  (c) Rods: Products of solid round, hexagonal or octagonal cross section which if over 0.375 inch in maximum cross-sectional dimension are in coils or cut to length, and which if not over 0.375 inch in maximum cross-sectional dimension are in straight lengths.  (d) Wire: A non-tubular product of any cross-sectional configuration, which if flat is in coils or	
	straight lengths, not over 0.25 inch in thickness and not over 0.5 inch in width, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils. 	CHAPTER 3 METAL PRODUCTS .	
	Notes:  1. For the purposes of this chapter —  (a) "wire" is deemed to be a base-metal product which conforms to the respective cross-sectional measurements for base-metal wires in chapter 2, whether or not conforming otherwise to the specifications set forth therein. In the provisions of this chapter which describe wire in terms of its cross-sectional dimension, the dimension specified is that of such wire without its metal coating, if any.  2. The provisions in this chapter which specifically refer to kitchen or table ware, or to table, kitchen, or household utensils and articles, include articles of types which are used outdoors as well as those which are used indoors.	
	Unit A Metallic Containers	
	Notes:  1. The provisions in this unit for containers include such containers whether or not equipped with fittings such as taps, valves, level gauges, and manometers. This unit, however, does not include  (i) containers with provision  made for circulating heating  or cooling fluids between the  walls, or with mechanical or  thermal equipment such as  agitators, heating or cooling  coils, or electrical elements  (see chapters 4 and 5 of this  section);  (ii) luggage, handbags, or flat goods  (see chapter 1D of section 7);  (iii) furniture (see chapter 4 of section 7);

	2. In determining the length of files and rasps (items 649.0107, inclusive), the tang (if any) should not be included.	
	3. The provisions for "interchangeable tools for hand tools or for machine tools" cover interchangeable tools which are designed to be fitted to hand tools or machine tools and which cannot be used independently, and include, but are not limited to, interchangeable tools for pressing, stamping, drilling, tapping, threading, boring, broaching, milling, cutting, dressing, mortising or screw-driving, but do not include saw blades, knives, or cutting blades, and do not include holding or operating devices even if attached to such interchangeable tools.	
	4. For the purposes of determining the rate of duty applicable to sets provided for in item 651.75, a specific rate of duty or a compound rate of duty for any article in the set shall be converted to its ad valorem equivalent rate, i.e., the ad valorem rate which, when applied to the full value of the article determined in accordance with section 402 or 402a of the Tariff Act of 1930 (19 U.S.C. (1970) 1041a, 1402), would provide the same amount of duties as the specific or compound rate.

	CHAPTER 5. ELECTRICAL MACHINERY AND EQUIPMENT	
	Notes:	
	1. This chapter does not cover  (i) electrical insulators or insulating materials (classifiable in other sections according to materials of which made);  (ii) certain carbons, electrodes, and brushes provided for in chapter 1E of section 5;  (iii) ceramic electrical ware (chapter 2D of section 5);  (iv) electric blankets and other electrically warmed bedding (see chapter 5B of section 3);  (v) washing machines, ironing machines, sewing machines, and other machines provided for in chapters 4 or 6 of this section; or  (vi) electrical instruments and apparatus provided for in section 7.  2. For the purposes of this chapter (items 682.05, 682.07, and 682.08), the rated kVA of a transformer is the kilovolt-ampere output on a continuous duty basis at the rated secondary voltage (or amperage, when applicable) and at the rated frequency without exceeding the rated temperature limitations.	

Tariff item number	Description of products	Rate of duty
	3. The provisions of this note apply to "tele- vision apparatus and parts thereof" provided for in items 685.11 through 685.19, inclusive, of this chapter.  (a) the term "complete", as used to describe television receivers, means a television receiver, fully assembled, whether or not packaged or tested for distribution to the ultimate purchaser.  (b) for the purposes of items 685.15 and 685.16 (i) each subassembly that contains as a component, or is covered in the same entry with, one or more of the following television components, viz.,  tumer, channel selector assembly, antenna, deflection yoke, degaussing coil, picture tube mounting bracket, grounding assembly, parts necessary for fixing the picture tube or tuner in place, consumer operated controls, or speaker, shall be classified in item 685.15; and  (ii) each subassembly shall be counted as a single unit, except that two or more different printed circuit boards or ceramic substrates covered by the same entry and designed for assembly into the same television models shall be counted as one unit. 1/	
	4. For the purposes of this chapter, "transceivers" are combinations of radio transmitting and receiving equipment in a common housing, employing common circuit components for both transmitting and receiving, and which are not capable of simultaneously receiving and transmitting. 2/	
	5. For the purposes of this schedule, hand-held Citizens Band (CB) radio transceivers are Citizens Band (CB) radio transceivers designed for operation in the hand, having a permanently affixed antenna and an internal microphone, and not designed for use with an external power source. 2/	

Note 3 is not in the Tariff Schedules of the United States on June 30, 1979.

	Unit A Optical Elements, Spectacles, Microscopes, and Telescopes, Optical Goods Not Elsewhere Provided For	
	Notes:	1
	1. The provisions for optical elements in this unit do not cover  (i) unmounted optical elements of glass or synthetic optical crystals unless such elements have been optically worked (see chapter 3A of section 5);  (ii) plates or sheets of polarizing material unless cut to shape or mounted (see chapter 3A of section 5);  (iii) photographic filters (see unit F of this chapter).  2. The term "optically worked", as used in this	
	unit, means that the glass or the synthetic optical crystals have been subjected to grinding or polishing incident to surface shaping for producing optical properties.	
	3. The provisions for mounted optical elements cover such elements when in a permanent frame or other mounting suitable for fitting to an apparatus or instrument and do not include mounted elements which are themselves separate instruments or apparatus such as spectacles, medical or dental mirrors, and hand magnifying glasses.	
	4. Sets comprised of tools, implements, and other articles fitted into and imported with cases containing microscopes provided for in item 708.71, and ordinarily sold at retail, and used, in conjunction with such microscopes, are classifiable therewith.

	Unit E Watches, Clocks, and Timing Apparatus	
1	<u>Notes</u> : <u>1</u> /	
	1. This unit covers watches and clocks, time switches and other timing apparatus with clock or watch movements, and parts of these articles. This unit, however, does not cover  (i) synchronous or subsynchronous motors (see chapter 5 of section 6);  (ii) screws, nuts, and bolts (see chapter 3D of section 6);  (iii) music boxes and their mechanisms (see chapter 3 of section 7);  (iv) combination articles provided for elsewhere in this schedule; or  (v) clock and watch glasses and glass domes (see chapter 3 of section 5).	
	2. For the purposes of this unit  (a) the term "watches" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches, stopwatches, and watches designed for use in skindiving) suitable for wearing or carrying on or about the person, whether or not the movement therein is within the definition of "watch movement" in note 2(b), below;  (b) the term "watch movement" means a timepiece movement measuring less than 1.77 inches in width and less than 0.50 inch in thickness;  (c) the term "clock movement" means any movement or mechanism, other than "watch movements" as defined in note 2(b), above, intended or suitable for measuring time;	

<sup>1/</sup> Headnotes 3(a) and 6, of TSUS schedule 7, part 2F, are omitted: headnotes 3(b) and 3(c) of TSUS schedule 7, part 2E, are revised and renumbered as notes 3(a) and 3(b), respectively, to this unit; headnotes 3(d), 3(e) and 3(f) of TSUS schedule 7, part 2E are renumbered as notes 3(c), 3(d) and 3(e), respectively, to this unit; and headnote 4 of TSUS schedule 7, part 2E, is revised as note 4 to this unit.

Tariff item number	Description of products	Rate of duty
	(d) the term "cases" embraces inner and outer cases, containers, and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases, and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches, and other apparatus provided for in this unit; and  (e) the term "jewels" includes substitutes for jewels.	
	3. (a) The complete citation for watches covered by item 715.05 and clocks covered by items 715.15 and 715.16 shall be each of such item numbers, followed by the appropriate item numbers for the respective movements and cases comprising such watches or clocks. Thus, item 715.05-716.04-720.20 is the correct citation for a watch in a gold case with a movement having over 17 jewels and valued not over \$15.  (b) In this unit, each of the rates of duty provided for watch movements, having no jewels or not over 17 jewels, not adjusted, not self-winding, and not constructed or designed to operate for a period in excess of 47 hours without rewinding (items 716.09 through 716.29, inclusive) is also the "base rate" for watch movements having the same width and number of jewels covered by item 719 For citation purposes, the two blanks on the end of the latter item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 719.27" would be the citation for an adjusted, self-winding watch movement, 1 inch wide, having 17 jewels, valued not over \$15.	
	(c) The width of a watch or clock movement, as defined in note 2(a) and (b) of this unit, is the shortest surface dimension through the center of the pillar or bottom plate, or its equivalent, not including in the measurement any portion not essential to the functioning of the movement; and the thickness of a "watch movement", as so defined, is the maximum thickness between the outside surfaces of the plate and bridges, or their equivalents.  (d) The additional duty for adjustments to watch movements applies to each adjustment of whatever kind (treating adjustment to temperature as two adjustments), in accordance with the marking as hereinafter provided for.	

Tariff item number	Description of products	Rate of duty
	(e) Bimetallic balance wheels which are not part of balance assemblies, and mainsprings with riveted ends, are each to be considered as one part or piece, for the purposes of assessing duties on assemblies and subassemblies provided for in items 720.75, 720.80, 720.82, 720.84, and 720.86.	
	4. Special Marking Requirements: Any movement, case, or dial provided for in this unit, whether imported separately or attached to an article provided for in this unit, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, or stamping, as specified below:  (a) Watch movements shall be marked on one or more of the bridges or top plates to show—  (i) the name of the country of manufacture;  (ii) the name of the manufacturer or purchaser;  (iii) in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings; and  (iv) in words, the number and classes of adjustments, or, if unadjusted,	
	the word "unadjusted".  (b) Clock movements shall be marked on the most visible part of the front or back plate to show—  (i) the name of the country of manufacture;  (ii) the name of the manufacturer or purchaser; and  (iii) the number of jewels, if any.  (c) Watch cases shall be marked on the inside or outside of the back cover to show—  (i) the name of the country of manufacture; and  (ii) the name of the manufacturer or purchaser.  (d) Clock cases and other cases provided for in this unit shall be marked on the most visible part of the outside of the back to show the name of the country of manufacture; and  (e) Dials shall be marked to show the name of the country of manufacture.	

Tariff item number	Description of products	Rate of duty
	5. Combination Articles Containing Watch or Clock  Movements.—A watch or clock movement (and its dial, if any) in a combination article is classifiable under the provision applicable to such combination article, but, in determining the duties on the combination article, the movement (and its dial, if any) shall be construc- tively separated therefrom and assessed with the same rate as would have applied if it had been imported separately. However, such separate assessment shall not be applicable to movements which, when imported, are in- stalled as the usual equipment of vehicles or craft provided for in chapter 6 of section 6 or as integral and essential parts of laboratory, industrial, or com- mercial apparatus or equipment.

	CHAPTER 3 MUSICAL INSTRUMENTS, PARTS, AND ACCESSORIES	
	Unit A Musical Instruments	
	Notes:	
	<ol> <li>This unit does not cover         (i) articles which are toys (see chapter 5         of this section); or         (ii) articles which are antiques (see         chapter 11 of this section).</li> </ol>	
	2. For the purposes of this unit  (a) the term "brass wind instruments" refers to wind instruments of the "cupped-mouthpiece family" such as, but not limited to, trumpets, trombones, tubas, bass horns, sousaphones, bugles, French horns, cornets, flugelhorns, and saxhorns;  (b) the term "wood-wind instruments" refers to wind instruments, usually sounded with reeds, and includes, but is not limited to, clarinets, oboes, bassoons, English norns, flutes, recorders, fifes, flageolets, piccolos, saxophones, and sarrusophones; and (c) the term "electronic musical instruments" embraces all musical instruments in which the sound is generated electrically, and conventional-type instruments not suitable for playing without electrical amplification, but the term does not include conventional-type instruments, fitted with electrical pickup and amplifying devices, when the instrument is suitable for playing without such amplification.	
	3. The provisions of this unit for string, wind, and percussion musical instruments include such instruments whether or not fitted with electrical pickup and amplifying devices. Such devices, however, are separately classifiable from the musical instrument with which imported unless such devices are, or are designed and intended to be, fitted into or housed in the instrument itself.

#### Part 5. Staging for Certain Compound Rates of Duty

A. Each item listed below has a compound base rate of duty and an ad valorem full concession rate. For each such item, the full concession rate shall become effective, and the staging of the amount of reduction from the base rate to the full concession rate shall take place, in accordance with staging rules provided for that item elsewhere in this schedule (see Annex III and general note 14(e)). In the staging of reductions to the full concession rate, the specific part of the compound rate shall be removed, and the ad valorem part of the rate reduced to the ad valorem full concession rate, by successively deducting equal annual amounts from each part of the rate appropriate to the staging rule applicable to the item.

## Concession Items for Which the Staging Differs from the General Staging Rule (See general note 14 to this schedule)

### Part 5. Staging for Certain Compound Rates of Duty

Each item listed below has, on the date of the protocol to which this schedule is annexed, a compound rate of duty (the ad valorem equivalent of which is listed as the base rate in Annex II) and has an ad valorem full concession rate. For each such item, the full concession rate shall become effective, and the staging of the amount of reduction from the base rate to the full concession rate shall take place, in accordance with staging rules provided for that item elsewhere in this schedule (see Annex III and general note 14(e)), except that such staged reductions shall first eliminate the specific part of the compound rate by deducting from it each year, until it is eliminated, an amount, in appropriate specific terms, the ad valorem equivalent of which is the amount of reduction for that year resulting from the application of staging rules provided for elsewhere (see above) to the total reduction from the base rate to the full concession rate (or that portion of the ad valorem equivalent rate in any year which is adequate to eliminate the specific part of the compound rate).

### ANNEX II

## Base Rate of Duty from Which the Total Amount of Reduction for Certain Concession Items Is Calculated (See general note 14 to this schedule)

For each item listed below, the amount of reduction shall be the difference between the base rate of duty listed below opposite the item number and the full concession rate. For each item not listed below on which a concession is made in this schedule, the amount of reduction is the difference between the rate for the corresponding item listed in rate column numbered 1 in the Tariff Schedules of the United States Annotated (1978), as modified by Supplements 1 to 5 thereto, and the full concession rate.
