NOTE BY THE SECRETARIAT

Under Article 102 of the Charter of the United Nations every treaty and every international agreement entered into by any Member of the United Nations after the coming into force of the Charter shall, as soon as possible, be registered with the Secretariat and published by it. Furthermore, no party to a treaty or international agreement subject to registration which has not been registered may invoke that treaty or agreement before any organ of the United Nations. The General Assembly, by resolution 97 (I), established regulations to give effect to Article 102 of the Charter (see text of the regulations, vol. 859, p. VIII).

The terms "treaty" and "international agreement" have not been defined either in the Charter or in the regulations, and the Secretariat follows the principle that it acts in accordance with the position of the Member State submitting an instrument for registration that so far as that party is concerned the instrument is a treaty or an international agreement within the meaning of Article 102. Registration of an instrument submitted by a Member State, therefore, does not imply a judgement by the Secretariat on the nature of the instrument, the status of a party or any similar question. It is the understanding of the Secretariat that its action does not confer on the instrument the status of a treaty or an international agreement if it does not already have that status and does not confer on a party a status which it would not otherwise have.

Unless otherwise indicated, the translations of the original texts of treaties, etc., published in this *Series* have been made by the Secretariat of the United Nations.

NOTE DU SÉCRÉTARIAT

Aux termes de l'Article 102 de la Charte des Nations Unies, tout traité ou accord international conclu par un Membre des Nations Unies après l'entrée en vigueur de la Charte sera, le plus tôt possible, enregistré au Secrétariat et publié par lui. De plus, aucune partie à un traité ou accord international qui aurait dû être enregistré mais ne l'a pas été ne pourra invoquer ledit traité ou accord devant un organe des Nations Unies. Par sa résolution 97 (I), l'Assemblée générale a adopté un règlement destiné à mettre en application l'Article 102 de la Charte (voir texte du règlement, vol. 859, p. IX).

Le terme «traité» et l'expression «accord international» n'ont été définis ni dans la Charte ni dans le règlement, et le Secrétariat a pris comme principe de s'en tenir à la position adoptée à cet égard par l'Etat Membre qui a présenté l'instrument à l'enregistrement, à savoir que pour autant qu'il s'agit de cet Etat comme partie contractante l'instrument constitue un traité ou un accord international au sens de l'Article 102. Il s'ensuit que l'enregistrement d'un instrument présenté par un Etat Membre n'implique, de la part du Secrétariat, aucun jugement sur la nature de l'instrument, le statut d'une partie ou toute autre question similaire. Le Secrétariat considère donc que les actes qu'il pourrait être amené à accomplir ne confèrent pas à un instrument la qualité de «traité» ou d'«accord international» si cet instrument n'a pas déjà cette qualité, et qu'ils ne confèrent pas à une partie un statut que, par ailleurs, elle ne posséderait pas.

	<p>Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.</p> <p>3. When, by application of rule 2(b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows:</p> <p>(a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.</p> <p>(b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.</p> <p>(c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.</p> <p>4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.</p>

In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:</p> <p>(a) Camera cases, musical instrument cases, gun and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and entered with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. However, this provision does not apply when such packing materials or packing containers are clearly suitable for repetitive use.</p> <p>6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, <u>mutatis mutandis</u>, to the above rules, on the understanding that only subheadings at the same level are comparable. This chapter does not cover: (a) slag or similar industrial waste prepared as micas (heading 2517); (b) Natural magnesium carbonate (magnesite), whether or not calcined (heading 2519); (c) Basic slag of chapter 31; (d) Slag wool, rock wool or similar mineral wools (heading 6805); (e) Waste or scrap of precious metal or of metal clad with precious metal (heading 7112); or (f) Copper, nickel or cobalt wastes produced by any process of smelting (section XV).</p> <p>2. For the purposes of headings 2601 to 2617, the term "ores" means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, or the metals of heading 2844 or of the metals of section XIV or XV, even if they are intended for nonmetallurgical purposes. Headings 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.</p> <p>3. Heading 2620 applies only to ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals.</p>

	<p><u>Additional U.S. Note</u></p> <p>1. The specific rates of duty imposed under the headings of this chapter on the metal content of ores and other materials shall apply to the assay quantity of metal contained therein, whether recovered as metals, as alloys or as chemical compounds or used directly in the manufacture of articles, except that with respect to ores or other materials provided for in this chapter which are subject to duty at specific rates on their copper, lead or zinc content, an absolute deduction for losses of 18 kg per dry metric ton from the respective quantities of each of such metal contents shall be allowed.</p> <p>2. When the classification of imported materials under any provision of this chapter is dependent on the percentage of metal content, such percentage shall be the ratio of the total quantity of the respective metal content to the total quantity of imported material when computed on a dry-weight basis; i.e., free of all uncombined moisture.</p> <p>3. Copper-bearing ores and other copper-bearing materials provided for in this chapter and unwrought copper and copper waste and scrap provided for in chapter 74, when smelted or refined in the United States and the products of smelting or refining exported, shall be exempt from duty, subject to the provisions of the Tariff Act of 1930, section 312 (19 U.S.C. 1312 (1980 ed.)).</p>

1	<p style="text-align: center;">CHAPTER 39</p> <p style="text-align: center;">PLASTICS AND ARTICLES THEREOF</p> <p><u>Notes</u></p> <p>1. Throughout this schedule the expression "plastics" means those materials of heading 3901 to 3914 which are or have been capable, either at the moment of polymerization or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticizer) by molding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.</p> <p>Throughout this schedule, any reference to "plastics" also includes vulcanized fiber. The expression, however, does not apply to materials regarded as textile materials of section XI.</p> <p>2. This chapter does not cover:</p> <p>(a) Waxes of heading 2712 or 3404;</p> <p>(b) Separate chemically defined organic compounds (chapter 29);</p> <p>(c) Keparin or its salts (heading 3001);</p> <p>(d) Stamping foils of heading 3212;</p> <p>(e) Organic surface-active agents or preparations of heading 3402;</p> <p>(f) Run gums or ester gums (heading 3606);</p> <p>(g) Synthetic rubber, as defined for the purposes of chapter 40, or articles thereof;</p> <p>(h) Saddlery or harness (heading 4201) or trunks, suitcases, handbags or other containers of heading 4202;</p> <p>(i) Plaits, wickerwork or other articles of chapter 46;</p> <p>(k) Wall coverings of heading 4814;</p>

Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:</p> <p>(a) Liquid synthetic polyolefins of which less than 60 percent by volume distills at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (headings 3901 and 3902);</p> <p>(b) Resins, not highly polymerized, of the coumarone-indene type (heading 3911);</p> <p>(c) Other synthetic polymers with an average of at least five monomer units;</p> <p>(d) Silicones (heading 3910);</p> <p>(e) Resols (heading 3909) and other prepolymers.</p>

	<p>4. For the purposes of this chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer which predominates by weight over every other single comonomer, comonomers whose polymers fell in the same heading being regarded as constituting a single comonomer.</p> <p>If no single comonomer predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.</p> <p>The expression "copolymer" covers all polymers in which no single monomer contributes 95 percent or more by weight to the total polymer content.</p> <p>5. Chemically modified polymers, that is, those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.</p> <p>6. In headings 3901 to 3914, the expression "primary forms" applies only to the following forms: (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions; (b) Blocks of irregular shape, lumps, powders (including molding powders), granules, flakes and similar bulk forms.</p> <p>7. Heading 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 3901 to 3914).</p>

	<p>8. For the purposes of heading 3917, the expression "tubes, pipes and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last mentioned, those having an internal cross section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width), or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses, but as profile shapes.</p> <p>9. For the purposes of heading 3918, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, colored, design-printed or otherwise decorated.</p> <p>10. In headings 3920 and 3921, the expression "plates, sheets, film, foil and strip" applies only to those of chapter 54 and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).</p> <p>11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of subchapter 11: (a) Reservoirs, tanks (including septic tanks), vests and sialer containers, of a capacity exceeding 300 liters;</p>

Within any one heading of this chapter, copolymers (including co-polycondensates, co-polyaddition products, block copolymers, and graft copolymers) are to be classified in the same subheading as homopolymers of the predominant comonomer and chemically modified polymers of the kind specified in note 5 are to be classified in the same subheading as the unmodified polymer, provided that such copolymers or chemically modified polymers are not more specifically covered by any other subheading and that there is no residual subheading named "other" in the series of subheadings concerned. 	<p><u>Additional U.S. Note 1/</u></p> <p>1. For the purposes of this chapter, the term "Elastomeric" means a plastics material which after cross-linking can be stretched at 20°C to at least three times its original length and that, after having been stretched to twice its original length and the stress removed, returns within five minutes to less than 150 percent of its original length. Elastomeric plastics may also contain fillers, extenders, pigments or rubber-processing chemicals, whether or not such plastics material, after the addition of such fillers, extenders, pigments or chemicals, can meet the tests specified in the first part of this note.</p>

In note 1 to this chapter and in heading 4002, the expression "synthetic rubber" applies to:</p> <p>(a) Unsaturation synthetic substances which can be sulfur into nonthermoelastic substances with, at a temperature between 18°C and 20°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanizing activators or accelerators, may be added; the presence of substances as provided for by note 5(b)(i) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticizers and fillers, is not permitted;</p> <p>(b) Thioplasts (TM); and</p> <p>(c) Natural rubber modified by grafting or mixing with plastics, depolymerized natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanization, elongation, and recovery in (e) above.</p>					
	<p>5. (a) Headings 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:</p> <p>(i) vulcanizing agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanized rubber latex);</p>

In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric (including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes--</p> $N = \frac{BYT}{1,000} \cdot \frac{100Y}{Z'} \cdot \frac{gT}{2} \cdot \frac{5T}{10}$ <p>When:</p> <ul style="list-style-type: none"> N is the average yarn number, g is the breadth (width) of the fabric in centimeters, Y is the meters (linear) of the fabric per kilogram, T is the total single yarns per square centimeter, S is the square meters of fabric per kilogram, Z is the grams per linear meter of fabric, and Z' is the grams per square meter of fabric. <p>Fractions in the resulting "number" shall be disregarded.</p>
